

Summer Camp 2009 June 29 - July 03 2009

Theme - Sustainability: Green Technologies

Imagine a day, you drove your car without spilling a dime from your pocket? A day, you pay just a dollar bill for your monthly electrical energy consumption? Yes, this is what renewable energy resources does! We have means to achieve this if we make use of the natural resources in an efficient way. Besides being less expensive, these energy resources are eco-friendly. Come and explore these alternative energy sources through hands-on activities during the camp!! The camp uses inventive & creative thinking to incorporate science, technology, engineering, and math into fun and memorable experiences.

Who & Where?

All the present SEW workshop participants (A must for getting the Girl Scout and SWE patches). Camp will be held @College of Engineering and Engineering Technology, NIU DeKalb Campus. Transportation would be provided from NIU Naperville to DeKalb and back on all the days. The last day of the camp (July 03 2009) would be held at the NIU-Naperville Campus. Parents are invited and are encouraged to attend the concluding session of the SEW and the Summer Camp.

Camp Fee

Free for all SEW participants.
