- Other Academic Units: 11%

Total: 100%
Notable faculty investigators in FY 15

Dr. Wendy Bostwick  
Assistant Professor  
Nursing and Health Studies

Dr. Joseph Magliano  
Presidential Research Professor  
Psychology  
Center for the Interdisciplinary Study of Language and Literature

Dr. Mark Schuller  
Assistant Professor  
Anthropology  
Center for NGO Leadership and Development
Funding Climate: Sponsored Programs

- Increasing administrative burden
- Fewer Federal dollars and greater competition
- New Federal Regulations
- More complex proposals and awards
Our Long-Term Goals

• More convenient support for faculty in planning and managing their sponsored funding;
• Streamline grants administration processes to reduce administrative burden;
• Increase administrative efficiencies to help faculty in meeting sponsored program goals; and
• Enhance compliance throughout the sponsored program lifecycle.
Our Short-Term Successes

- Pre and post staff now using one electronic system to track workloads and monitor activity between areas;
- Eliminated redundancy in our award notification process and transitioned from paper to electronic award documents;
- Launch of regular campus brown-bags for “meet with a Development Specialist and Grant Administrator” sessions.
Final Thoughts

✓ Funding is holding steady but the composition of our funding is changing;

✓ Support for research and sponsored funding is a shared responsibility across many campus units;

✓ Support needs to be investigator focused and compliance centric; and

✓ The Division of Research and Innovation Partnerships and Sponsored Programs Administration is invested in identifying ways to reduce administrative burden and increase productivity.
