

Acknowledgments

The work herein succeeded because of the commitment, and encouragement of so many people.

Janet Jones, co-director and district director of curriculum and instruction, Rockford Public Schools, gave her intellect, heart, soul, and body to “make it happen” for teachers. Conard White, a Core Team member, research associate, and professor emeritus at Northern Illinois University, has been a partner in design and execution of all research, collection, and analysis of data, as well as the interpretation of the results. Joseph Kolar, external evaluator, and formerly an administrator in the Chicago Public Schools, has been a partner on all the initiatives in the design and execution of all evaluation activities. Jerry Allen, a technology education teacher, Grayslake High School, Illinois, began as a teacher participant in the PHYS-MA-TECH initiative, 1989-1992; as a Core Team member, recognized as a master teacher and peer leader, has added a leadership dimension to the initiatives rarely found in other national initiatives.

Several administrators, Diane Kuehl of Rock Valley College, co-director for the project and acting dean of Academics, along with the following Northern Illinois University administrators, strongly backed the project: Promod Vohra and Ramuldas Kasuba, Deans of the College of Engineering and Engineering Technology and professors of technology and mechanical engineering, respectively; Frederick Kitterle, Dean of the College of Liberal Arts and Sciences and professor of psychology; Cliff Mirman and Dennis Stoia, professors of technology, who chaired the Department of Technology. When funding ran out, the Provost’s Office of Northern Illinois University carried us through and enabled us to meet our requirements.

The Faculty Associates and Program Leaders were: Lori Alfe, Will Ashford, Gary Baker, Marie Baker, Radha Balamuralikrishna, Chuck Billman, Richard Blecksmith, Susan Callahan, Ann Carter, Michael Day, Patrick Ervin, Joe Etminan, Phil Eubanks, Janet Giesen, Richard Greene, Tom Guensburg, Lazslo Hanzely, Bernard Harris, Eric Hoffman, Mike Kelly, Dennis Kevill, Gail Jacky, Jim Lockard, Paul McCombs, Karen Messley, Carole Minor, Cliff Mirman, Jenny Parker, Brad Peters, Kurt Rosentrator, David Rusin, Bill Scarpaci, Kerri Shaw, Brian Shelton, Gordy Skattum, Steve Squier, Paul Stoddard, Toni Tollerud, Rachel Turner, Mike Webb, Mike Welden, and Augden Windelborn.

Gail Jacky, the primary editor, Eric Hoffman, the publication consultant and Web wizard, Ryan Dally graphics designer, and William Zeisel, working with the American Association for Higher Education, were all essential to the creation of this document.

The commitment and funding by the National Science Foundation, the Illinois State Board of Education, the Illinois Board of Higher Education, Rockford Public Schools, Rock Valley College, Northern Illinois University, and business, industry and community partners made this initiative possible. Patrick Derry (CEO, Rockford Process Control) led the business and industry partnerships while Victoria Benson provided dedicated leadership and commitment in the coordination of many complex on-site adventures for teachers in the world of business, industry and community organizations.

Most of all, we owe thanks to our families, who hardly saw us for so many nights, weekends, and holidays. To them, we say thank you for supporting us in serving the region’s schools and living our passion to “make a difference.”
