March 1  Ashley De Lio  
Förster Energy Transfer Enhancement of Phosphorescent OLEDs

March 8  Elettra Piacentino / Dominic Rebollar  
New Advances in 2-D Materials / Quantum Dots.

March 22  Heather Barkholtz (dissertation defense)  
Synthesis and Characterization of Nanoalloys and Non-Precious Metal Catalysts for Energy and Environmental Applications

March 29  Sudeshna Chakraborty (candidacy)  
Synthesis and Characterization of Copper-Doped Zinc Oxide Nanomaterials

April 5  Jue Gong / Haiping Xu  
Relationship between Electron-Lattice Interaction in Charge Transfer Energy/ Troilus and Cressida

April 12  Sura Ginting / Dustin Helmer  
Henry IV Part 1 / Henry IV Part 2

April 19  Tim Perkins (candidacy)  
Exploratory Synthesis and Characterization of Metal-Organic Frameworks and Metal Sulfides

April 26  James O’Sullivan (candidacy)  
Exploratory Solid State Synthesis: Methods and Characterizations

May 3  Dean Walters  
Progress toward Nickel Oxide Nanostructures Using Glancing Angle Deposition
