

Major in Family and Child Studies: Emphasis 1: Family and Individual Development

College of Health and Human Sciences
Northern Illinois University

Transfer Guide for Illinois Community College Students

The mission of the School of Family, Consumer, and Nutrition Sciences at Northern Illinois University is to generate and transmit knowledge that supports families and individuals in meeting human needs for self development, social interaction, resource allocation, clothing, food and nutrition, and hospitality. All programs lay the groundwork for graduate study.

All three emphases in family and child studies prepare the student to work as professionals serving families and children, or to pursue secondary teaching certification in Family and Consumer Science. The [*family and individual development*](#) emphasis provides career enhancement for students who have prior work experience with individuals and/or families, or who plan to pursue a career in secondary education, or higher education in family and child studies and related fields. It is recommended as a preparation for advanced degrees in related fields with a research rather than a service focus. Students hoping to do graduate work should strongly consider a minor in sociology, psychology, or political science.

The family and child studies major is a limited admissions program which requires students to submit a program application directly to the school office. Students must have already completed the course requirements as described in the *Undergraduate Catalog* [limited admission section for Family & Child Studies](#) prior to submitting an application. Applications for fall admissions are due by March 1 and applications for spring admission are due by September 15. Student admitted to NIU, but not to a specific major in the school, will be classified as pre-majors in the School of Family, Consumer and Nutrition Sciences.

This transfer guide is designed as an advising tool to facilitate a smooth transition between institutions by identifying relevant course work recommended to be completed prior to transfer. Community college students are advised to also complete an A.A. or A.S. degree prior to transfer and to consult the [NIU Articulation Handbook](#) for information regarding the transferability of courses. All students planning to transfer are advised to consult with the College of Health and Human Sciences for detailed information.

Prospective students should make formal application to the School of Family, Consumer, and Nutrition Sciences by March 1 of their sophomore year. A student who enters the program with the courses as listed and who have completed an A.A. or A.S. degree can usually expect to complete the NIU program in two years.

Major in Family and Child Studies – Emphasis in Family and Individual Development¹

Courses Recommended Prior to Transfer
