Summer 2014 Work/Internship Opportunity

Environmental Restoration Technician Positions
The Restoration and Maintenance Divisions of ENCAP, Inc. consist of teams of environmental professionals who specialize in environmental restoration projects, water-resource projects, native landscaping and general land improvement. We are looking for individuals interested in seasonal positions for environmental restoration work for our shop based out of DeKalb. The position is almost entirely in the field, and involves invasive species management using several methodologies. This work is typically full-time, Monday-Friday (~40 hours a week) depending on weather conditions, with opportunities for overtime. The position duration is typically May-October (or flexible depending on school schedules, etc). Pay scale is $10-$13/hour, depending on qualifications/experience.

This position offers the opportunity to gain valuable skills in the environmental restoration industry:

- Identification of native and non-native/invasive plant species
- Practical knowledge of invasive species management and methods
- Use of restoration field equipment
- Some work locations in high quality local native areas
- Valuable work experience to include on a resume
- Possible qualification as internship credit

Interested Persons send resumes with contact information to Samantha Melton at smelton@encapinc.net
Resumes are considered on a rolling basis until positions are filled.
