You can participate in the study if your child/adolescent:

- Has an Autism Spectrum Disorder ✓
- Is capable independently reading and answering questions about social situations involving bullying ✓
- Is in 6th through 12th grade ✓
- Spends some time being educated in general education classrooms ✓
- Is not home schooled ✓

Join others in sharing your knowledge of the school experiences of children and adolescents with Autism Spectrum Disorder!

This NIU study seeks to better understand how children on the Autism Spectrum experience school by investigating bullying experiences as well as how these experiences make middle and high school students on the Autism Spectrum feel.

If you agree to participate in the study, your child will be asked to fill out one questionnaire about his or her bullying experiences, one questionnaire about how he or she feels overall about him or herself, and one questionnaire about how supported he or she feels.

In addition one parent or caregiver will be asked to fill out a questionnaire about how much bullying they think their child experiences, how they think their child feels about him or herself, and two questionnaires that ask parents to rate a variety of their child’s social behaviors.

The entire process is done through the mail free of charge and should take each child participant approximately 40 minutes and each parent approximately 60 minutes.

All child/adolescent participants are eligible for a drawing in which one $50 gift card and two $25 gift cards to locations of their choice will be awarded as prizes!

All parent and child responses will be kept completely confidential; parents will receive an overall summary report of the study findings.
