Text: Intro Stats, Fourth Edition. by DeVeaux, Velleman, and Bock

STAT 208 COURSE DESCRIPTION:

Stat 208 is designed to provide students with an understanding of reasoning involved in the statistician's approach to a variety of problems. Not open for credit toward the major or minor in mathematical sciences. Not open for credit to students with credit in an upper-division statistics course or in OMIS 324 or UBUS 223. Not used in major or minor GPA calculation for mathematical sciences majors or minors. Credits: 3

Teaching philosophy: Standard lecture and recitation supplemented with engaged student directed learning explorations of global data and writing enhanced course activities to develop career ready skills. Students at times will work collaboratively on some quizzes/projects in lecture.
LEARNING OUTCOMES FOR STAT 208:

- To develop a basic understanding of statistics and its role in today's world
- To develop a basic understanding of probability; its role in various disciplines and its usage in statistical calculations;
- To understand the concept of inductive reasoning as it is used in statistical inference: generalizing from a sample to the whole, while controlling the amount of error incurred in the process;
- To develop an understanding of statistical reasoning and an ability to apply this reasoning to real-life problems;
- To appreciate the universal applications of statistical methods in every aspect of modern life
- To be able to correctly interpret the statistical results that appear in the public media and other places.
- To develop logical thinking, abstract thinking and problem solving skills

STUDENT ASSESSMENT

GRADING

- Your final grade will be based on the following components:
  - Three midterm exams, each worth 100 points.
  - The final exam is cumulative and worth 150 points.
  - Average of homework assignments weighted to 50 points. The lowest three assignment grades will be dropped before computing the average. (e.g. After your drops, if your homework average = 90%, then you’ll receive 0.9 x 50 = 45 pts)

- There is no extra credit except for what is mentioned in this syllabus.

- With a total of 500 points possible, the cut points for letter grades will be no higher than those listed in the below GRADE SCALE:
<table>
<thead>
<tr>
<th>Stat 208</th>

</table>

- Please note that mistakes in your grades on homework and/or exams may occur. You have one week from the time the paper been handed back to notify the instructor of the mistake in person. If you wait longer than the one week, no change will be made to the grade.

- A grade of incomplete (I) will only be considered for students who are passing the course, but cannot complete the course due to health or family reasons. All meetings regarding incompletes must be in person in my office.

EXAMS

- The midterm exams will be given during regular class time. The exact dates for these exams will be announced in lectures.

- All exams are closed-book, but relevant formulas will be provided at the exam. You may also use a hand-held calculator at the exams.

- It is your responsibility to bring (i) NIU picture ID, (ii) pencil, (iii) eraser, and (iv) calculator for exams. Sharing of any of these items is not allowed. You would be expected to do all calculations by hand if you do not have a calculator. You cannot use calculators in cell-phones, PDAs or laptops.
Cell phones are to **be turned off** (not just muted) and **kept away** during exams.

- It is not acceptable to video tape, audio tape or photograph the work of instructors, TA's or other students. This is an infringement of their intellectual property. Taking a copy or photo of a student's work will be considered cheating. If you are caught your phone or device will be confiscated for the remainder of the class period.

- It is important to be on time for exams. If you arrive late and one or more students have already submitted their exams and left the room, then you may (and probably will) be denied the opportunity to take the exam. In such cases, you may be given a zero on the exam, or you may be given a make-up. The decision will be up to the instructor.

- **Make-up exams will only be given in advance, when a student has a planned, documentable, and excusable absence on a test date and personally negotiates the make-up in advance.** For sudden, documentable, and excusable absences (illness, death, etc), the points from the missed exam will be added to the final exam. All documentation must be provided in hardcopy to the instructor before the absence. Unexcused absences (oversleeping, forgetting, etc.) will result in a score of zero.

- The Final Exam is on Friday December 11, from 8:00 -9:50 AM. This is a mass exam with different timing from the standard final exam schedule. The Final Exam room will be announced in lecture or posted on the Division of Statistics web page.

**HOMEWORK**

- Homework (even numbered problems only) is due in your recitation period, unless other arrangements are made with your TA. The assignments will be due in the week indicated. **No late homework will be accepted.** Please do not give any assignments to your instructor.
- Students are allowed to discuss homework assignments, but you should not look at another student's paper. Each student must write his/her solutions in their own way, using their own words.

- Assignments are to be neat and presented logically on loose-leaf paper. If more than one sheet of paper is used, the assignment must be stapled together. Please do not ask your instructor or TA for use of a stapler. Spiral paper is unacceptable. If your assignments are messy, disorganized or do not follow the stated instructions, you will not receive credit for that assignment. You are to show all your work. Just stating an answer (for example, from the back of book) will not ensure full credit.

- Please note that because of the quick pace of this course it is unlikely that all of your homework will be graded and returned to you before the exams. You may want to make copies of your homeworks before turning them in.

**QUIZZES**

- Announced quizzes and/or pop quizzes will be given. The average of all quizzes will be weighted to 25 points. These points will be added to your total at the end of the semester as extra credit. No makeup quizzes will be given.

**ACCESSIBILITY**

Northern Illinois University is committed to providing an accessible educational environment in collaboration with the Disability Resource Center (DRC). Any student requiring an academic accommodation due to a disability
should let his or her faculty member know as soon as possible. Students who need academic accommodations based on the impact of a disability will be encouraged to contact the DRC if they have not done so already. The DRC is located on the 4th floor of the Health Services Building, and can be reached at 815-753-1301 (V) or drc@niu.edu.

The Americans with disabilities statement is available at niu.edu/disability/accessibility-statement/index.shtml

ACADEMIC INTEGRITY STATEMENT

- The Statement of Academic Integrity in the Undergraduate catalog will be strictly enforced with regard to homework assignments, quizzes, and exams.

- Please see:
  http://www.niu.edu/stat/courses/pdfs/Accessibility_statement.pdf
  for policies on academic integrity, attendance and accommodations for students with disabilities.

GUIDELINES AND GENERAL INFORMATION

- You are encouraged to ask questions and to participate in class discussions, however talking in class or causing repeated interruptions while the instructor is lecturing is highly frowned upon.

- Cell phones are to be muted or turned off during lectures, recitations and visits to office hours and kept away during exams and quizzes. Violations will be considered as class disruptions, or worse, and will be treated accordingly.

- Texting during class is not allowed. If you are caught, your phone will be confiscated for the remained of the class period. If you are caught texting a second time, you will be asked to leave the class for that day. Texting, emailing, photography or video tapes during lecture is not allowed

- It is your responsibility to be sure that your work is turned in and that you receive the notes and announcements (all announcements are
made at the beginning of class). Missing an announcement will not be accepted as a valid excuse for missing an event (test, quiz etc.). If you frequently miss class the instructor reserves the right to deny office hour privileges to you.

- Late arrivals and early departures from class are strongly discouraged, except in cases of emergency.

- Students are to remain for the entire session unless excused by the instructor beforehand or confronted with a serious personal emergency. For instance, it is not acceptable for students to walk in and out of class to answer cell phones, take casual bathroom and smoking breaks, or attend to other personal matters.

- It is not acceptable to use an iPod, read a newspaper, use a laptop for anything other than taking class notes, study for other classes, or engage in other behavior that distracts one from the class proceedings one the session has started. All students are to comport themselves in a manner consistent with common business etiquette and professional ethics.

- If you have a disability, please make arrangements with the Disability Resource Center (DRC) early in the semester, let me know and bring your documentation to my office in person.

- If you are traveling on University business (conferences, athletics, honors requirements) or have family or religious commitments please bring your documentation to my office in person at least two (2) weeks prior to the event as students will need to fill out an accommodation/leave form.

- The syllabus may be changed at any time. Changes will be announced in lecture. This syllabus is a guide and every attempt is made to provide and accurate overview of the course. However, circumstances and events may make it necessary for the instructor to modify the syllabus during the semester and may depend, in part, on the progress, needs and experiences of the students.
TUTORING AVAILABLE TO STAT 208 STUDENTS

- The Stat Assistance Center (SAC) located in DU 326 offers tutoring to STAT 208 students. Tutoring is provided by TAs, the TA who is teaching your recitation as well as TAs from other recitation sections. A schedule of which TA is available at what time(s) will be posted in DU 326 and on the Division of Statistics website.

- ACCESS (Access to Courses and Careers through Educational Support Services) and PAL (Peer Assisted Learning) Walk-in Tutoring Centers are open to all NIU undergraduates. Students in STAT courses are the second heaviest users of these services. These services are available at New Hall, West Hall Room B004, Grant South Lower Level, Founders Library Room 302. For more information, see www.tutoring.niu.edu, E-mail ACCESS@niu.edu or go to Williston Hall Room 100.

SUGGESTIONS

- To do well in this course, you should attend class regularly.
- Please try to keep up with the class. If you fall behind, then you will have to work much harder to catch up.
- Note that homework and quizzes combined are 15% of the total points.
- If your quiz scores are consistently poor, then that is a red flag that something is going wrong.
- Please feel free to talk to your TA or instructor. If you are falling behind or getting lost, do not wait; act on it as soon as possible. Get help, spend more time studying, form study groups, go to your instructor's office hours, go to the Statistics Assistance Center (DuSable 326) - do whatever works for you.
STUDENT ACKNOWLEDGEMENT STAT 208 section
Date:

Please print this document and return it to your instructor by the end of the second week of classes in Stat 208

"I, ________________________________, have completely read this syllabus and understand and agree to the course requirements."

Please indicate below any special needs or circumstances that may have some impact on your work in class, and for which you require special accommodations. Documentation of such circumstances must be stapled to this form. Such accommodations may include but are not limited to medical needs, athletic competition, religious observances, physical or mental disability, in ability to arrive in class on time or need to leave class early.
