Master of Science in Management Information Systems

The M.S. program in management information systems prepares students to assume leadership roles in the area of business information systems. The program effectively integrates the technical area of computer technology with business processes. The purpose of the program is to expose students to current information technologies and the application of contemporary information management theories.

The program consists of two phases. **Phase One** is designed to address deficiencies in undergraduate course work considered to be prerequisite for the **Phase Two** (30 semester hours) graduate course work. Students with significant undergraduate course work in business may be waivered from some, or all, of the Phase One requirements. Exemption exams are also available to waive Phase One requirements. There is no charge for the exam, however, a student may only attempt each exam once.

Phase Two consists of 10 courses, seven of which are required of all majors and three of which consist of elective courses selected by the student with the approval of the academic program coordinator. Whereas the required courses ensure an in-depth exposure to important management information systems issues and technology, the elective courses enable the student to survey related areas or to focus in a particular area of his or her choice. Moreover, the focus can also be achieved through selecting courses from the Business Analytics Specialization and/or SAP and Business Enterprise Computing Specialization offered in the program.

The student is required to complete a minimum of 30 semester hours of approved graduate work beyond Phase One and the baccalaureate degree. Of these 30 semester hours, 21 must be in classes reserved exclusively for admitted graduate students. Students-at-large are prohibited from registering for graduate business courses without departmental approval. The total credit from courses taken for graduate credit at other accredited institutions which are accepted in transfer plus credit earned at NIU as a student-at-large may not exceed 9 semester hours.

Each MIS student will not be allowed to take more than 12 credit hours per semester.
SECTION B – Recorded, but further approval needed before inclusion in the Graduate Catalog

Phase One and the baccalaureate degree. Of these 30 semester hours, 21 must be in classes reserved exclusively for admitted graduate students. Students at large are prohibited from registering for graduate business courses without departmental approval. The total credit from courses taken for graduate credit at other accredited institutions which are accepted in transfer plus credit earned at NIU as a student at large may not exceed 9 semester hours.

**Required Courses**

With approval of the academic program coordinator, other courses may be substituted for a maximum of 9 semester hours of Phase Two course work.

</tbody>
</table>

A specialization is not required to complete the MIS program. But students may choose one or two following specializations in the program.

**Specialization in Business Analytics Specialization** (9)

The specialization in Business Analytics specialization is for the students to solve complex decision problems in a business environment with a combination of quantitative skills, modeling techniques, and hands-on expertise using current software applications for data driven decision making. Students with these skills are in high demand in a variety of industries and sectors including accounting, management, marketing, finance, information systems, operations, health care, engineering, and energy. Equipped with a solid technical foundation in data analysis and model-driven management decision making, this specialization prepares the students for successful careers in this growing field.

**Specialization in Business Analytics Specialization** consists of the following courses:

<table>

SECTION B – Recorded, but further approval needed before inclusion in the Graduate Catalog

- OMIS 670 - Social Media Analytics for Business (3)
- OMIS 694 - Advanced Topics in Information Systems (3) (For the specialization in Business Analytics, students must take the topic: Seminar of Research Methodologies and Applications in Business Analytics.)

Students who choose this specialization will use the above three courses to serve the Phase Two Elective requirement.

**Specialization in SAP and Business Enterprise Computing Specialization (9)**
SAP is the market leader in business enterprise computing software and Business Enterprise Computing is a broad category of technologies, applications, and practices for gathering, storing, accessing, and analyzing enterprise data to support effective business operations. The specialization in SAP and Business Enterprise Computing specialization will allow the students to understand how to run organizations more effectively by improving various business processes and using SAP technology.

**Specialization in SAP and Business Enterprise Computing Specialization** consists of the following courses:
- OMIS 643 - Enterprise Process Improvement (3)
- OMIS 653 - Enterprise Systems Configuration with SAP (3)
- OMIS 661 - Business Intelligence Applications and Tools (3)

Students who choose this specialization will use OMIS 653, OMIS 661, and one of the elective courses to serve the Phase Two Elective requirement.

---

**Master of Science in Education in Elementary Education**

**Requirements**
- Majors in elementary education LTLA and TLEE courses.
- Non-Thesis Option
  - TLEE 587 - Teaching Practicum in Education Credits: 1-6
- Thesis Option
  - Same as the non-thesis option except that a minimum of 6 semester hours in TLEE 609, Master’s Thesis, must be taken in lieu of TLEE 560 and TLEE 586/TLEE 587.

**Comprehensive Examination**
- Students in the non-thesis defense.
