Add a contact
Your Contacts list simplifies your communications and lets you see presence and contact information for the people most important to you. Add to it anyone – inside or outside your organization – you expect to be interacting with regularly. To add a contact:
1. Using Lync search, locate the person you want to add. (See previous section.)
2. Right-click the person’s listing in the search returns.
3. Click Add to Contact List.
4. Click a group to add your new contact to.

View a contact card
The contact card contains details from a contact’s company directory, such as the person’s office location, phone numbers, organization, and Outlook calendar free/busy information. To see someone’s card, find the person on your Contact list or via search, point at the photo area, and then click the contact card icon.
Create a group
You can set up a group for each team you work with so that you can see at a glance who is available at any given time or communicate with the entire team at once. To create a new group:
1. In the Lync main window, click the Add a Contact button.
2. In the drop-down menu, click Create a New Group.
3. In the space that opens up at bottom of the window, type over the phrase New Group to give your group a name.

Add audio, video, sharing, to an IM conversation
You can quickly add audio, video, or a presentation to your IM conversation, and/or invite others to join the conversation, by selecting the appropriate button(s) at bottom of the conversation window:

Switch between tabbed conversations
If you have multiple conversations, chat sessions, or meetings going on at once, Lync displays them all in one place, which lets you toggle between them. Click any tab to bring that activity to the foreground.

Send an IM
Use instant messaging (IM) to get in touch immediately with your available contacts.
1. In the Lync main window, click the name or pause on the picture of the contact you want to send an IM to. (If you want to IM more than one contact, hold down the Ctrl key, and click each contact that you want to reach.)
2. In the display bar that appears, click the IM icon.
3. Type your message in the message input area at bottom of the IM window, and then hit Enter.

Some features might not be available for your account. Contact your support team for more information.

Find a previous IM conversation
Lync automatically saves your IM conversation history. To view or continue a previous IM conversation or see an IM request you may have missed:
1. Click the Conversations tab (on the Lync main window above the Search box), then click All or Missed, depending on what you are looking for.
2. An Outlook window will open displaying a list of your IM conversations. Double-click the conversation that you want to view or resume.
