Blackboard Mobile™ Learn Supported File Types

The Blackboard Mobile Learn application is capable of displaying any file type; however, the devices on which the application runs only support certain file types. The following are the file types that are supported on the various devices for which we build natively.

	Video	Audio	Documents/Images
iPhone®	MPEG–4, M4V, MP4, MOV	AAC, MP3, ALAC, WAVE	JPG, TIFF, GIF, DOC, DOCX, HTM, HTML, KEY, NUM, PAGES, PDF, PPT, PPTX, TXT, RTF, VCF, XLS, XLSX
BlackBerry®	MPEG–4, 3GPP, MP4, AVI, MOV	MP3, AAC, MIDI, WAVE, WMA	ZIP, TXT, HTML, PDF, WPD, DOC, XLS, PPT
Android™	3GPP, MPEG–4, M4A	3GPP, MP3, OGG, WAVE, MIDI	JPEG, GIF, PNG, BMP, DOC, DOCX, HTM, HTML, PPT, PDF, PPTX, XLS, XLSX, TXT, RTF

A Few Things to Remember:

•It is important to note that Flash content does not play on any of these mobile devices (with the exception of Android 2.2 with Flash 10.1).

•For some platforms, like Android, there are separate applications that can augment the amount of supported file types. Please consult the respective application store for availability.
