We Solve Problems

Senior Design Program 2020-2021

Expand your company’s capacity to innovate by engaging a team of innovative next-gen engineers to solve challenges for your organization. Let an NIU senior design team take on your challenge. The NIU College of Engineering and Engineering Technology has already solved real-world problems for companies of all sizes, resulting in the creation of products, systems, processes, automation, algorithms or smart technologies. For a minor investment, your company gains the benefits of:

- Forty state-of-the-art laboratories.
- Industry-experienced faculty who are distinguished experts in their fields.
- A team of three to five seniors, a graduate assistant and a faculty advisor.

Let us assemble an interdisciplinary team that is tailored to your specific challenge, chosen from any combination of engineering disciplines including biomedical, electrical, engineering technology, industrial and systems engineering, mechanical and/or mechatronics.

Teams are being formed now for the fall 2020/spring 2021 academic year. Call me today: Dean Donald Peterson, Ph.D., at drpeterson@niu.edu or 815-753-2256.
