

Environmental Studies - Advising Check List -

Minor

You should consult with your advisor when planning out your elective courses. Not all courses on the course lists will be offered every year and advising will help you identify courses to take.

This check list is intended to help you and your advisor keep track of your completed ENVS courses. As courses are taken, the "completed" section is filled in to make it easier to identify where you still have courses to take. The notes section can be used to identify when you have taken a course that will be substituted for a particular course; to identify community college courses that are equivalent to a course at NIU; or, to list suggested courses based on your professional goals.

**Starred items have prerequisites

Select 7 courses in total

ENVS Core Course Requirements (choose 3 courses)

	Completed	Notes
ENVS 301 (3)		Spring (maybe summer)
ENVS 302 (3)		Fall
