Introduction

The purpose of this Handbook is to provide school psychology students with information about the procedures, regulations, and requirements for completing the doctoral degree in the Department of Psychology. When used with other departmental literature (e.g., Graduate Student Manual, Graduate School Catalog), this handbook is designed to facilitate your progress through the program. It is important, therefore, that you read all sections of the Handbook so that you are thoroughly familiar with the program and department requirements. We hope that your educational career at Northern Illinois University is exciting, challenging, and educationally profitable.

Overview of the Program

The School Psychology Ph.D. Program at Northern Illinois University (NIU) offers a 90-hour, full-time Ph.D. program that provides comprehensive training in general psychology as well as specialized training in the applied area of school psychology. Note that NIU also has a Specialist in School Psychology (SSP) program that is approved by NASP and CAEP. Instituted in 1978, the NIU school psychology educational license program received full approval from the National Association of School Psychologists (NASP) and the National Council for Accreditation of Teacher Education (NCATE) in 1992 and has maintained this status. Note that NCATE is now the Council of Accreditation of Educator Programs (CAEP). The program earned accreditation from the American Psychological Association (APA) in 2010, effective 2009 (please contact the APA Office of Program Consultation and Accreditation with any questions: 750 First St., NE, Washington, DC 20002, phone: (202)336-5979, fax: (555)336-5978).

The primary goal of the NIU School Psychology Ph.D. Program is to train professional psychologists to work in schools, clinical practice, and university settings. Coursework and practica experiences provide a synthesis of essential theoretical and applied approaches across developmental, cognitive, social, and behavioral areas. Graduates of the program are prepared to function in multiple roles including treatment, assessment, and consultative modalities, as well as teaching and research roles.

Admission Requirements and Procedures

Our application process is competitive and we receive many more applications than we can accept each year. Please note the Department of Psychology and our School Psychology program admits only full-time students; we do NOT have a re-specialization program. We strive to provide assistantship support to all of our students (see section on Assistantships), with priority given to our Ph.D. students. Please see below for important application procedures. We encourage students with cultural and individual diversity to apply to the program. Please see the following link for the APA Required Disclosure of Education/Training Outcomes and Information Allowing for Informed Decision-Making to Prospective Doctoral Students http://www.niu.edu/psyc/graduate/school/outcomes.shtml.
Applying to the Graduate School

Students applying to our doctoral program must submit the following materials to the NIU Graduate School by **December 1**:  
- Graduate School application and fee (including statement of goals).  
- Three letters of recommendation.  
- Transcripts of all undergraduate and graduate work (unofficial is fine).  
- Graduate Record Examination (GRE) scores (temporarily not required (COVID) in 2020 and 2021; required in 2022 for fall 2023 admits, now no longer required for 2023 and beyond).

The statement of goals, transcripts, and letters of recommendation should be uploaded to the MyNIU portal. Any hard copy items should be sent to the Graduate School, 223 Adams Hall, DeKalb, IL 60115. Additional optional materials, including writing samples and applications for assistantship, for example, should be sent to the Psychology Department, Northern Illinois University, Graduate Program Assistant, DeKalb, IL 60115.

Criteria Reviewed and Process:
For strongest consideration for admittance into NIU’s doctoral program in school psychology, our candidates typically have:  
- A B.A. or B.S. in psychology, although other related majors are considered.  
- Earned a strong undergraduate GPA; typically above 3.40.  
- Strong letters of recommendation.  
- Relevant research and/or applied experiences.  
- A successful interview at our interview day, in person or online.

Students with strong credentials are invited to interview during our annual *Interview Day* (typically in early February). Students unable to attend Interview Day have the option to be interviewed at a scheduled time prior to Interview Day. Candidates are notified of our admissions decisions as they are made following interviews. Assistantship decisions are made following admissions decisions; however, students typically have their assistantship offer prior to making their decision to accept admission to the program (by April 15th). Typically, three or four Ph.D. students are admitted to the program each year and are provided assistantship support (see section on Assistantships).

Transfer Students

**Students applying to our Doctoral Program with a Master’s Degree from another program:** Please apply using all of the same procedures and criteria listed above. The Program Director will review your transcripts for any courses that may be waived for the Doctoral degree. However, please note that typically very few courses are waived.

**NIU SSP Program students interested in applying to the NIU Doctoral Program:** There is no guarantee that students in the NIU SSP Program will be able to transfer to the Doctoral Program. Interested students should discuss this possibility with the Program Director.
their respective faculty mentor. If the student wants to apply to the Doctoral Program they should understand that they will be considered as a new applicant to the program. The student must provide a formal letter requesting this consideration along with a statement of goals (i.e., personal statement) to the Program Director. The program faculty will review this request along with other criteria listed above (e.g., GRE scores, GPA, performance in program, etc.) at the time of admissions decisions and inform the student of the outcome in a letter by April 20 of that year.

**Educational Philosophy and Training Model**

The school psychology program is committed to the scientist-practitioner model and is designed to train professionals to contribute to the psychological well-being of children and adolescents. The faculty believe a school psychologist is characterized by the knowledge and ability to bring a scientific approach to the study, assessment, and treatment of children and adolescents to maximize their functioning in educational and other appropriate settings. The program is organized around four broad goals that graduates of the program will learn (a) a solid foundational understanding of broad psychological principles, (b) the profession and professional practice of school psychology, (c) appropriate assessment and intervention methodologies, and (d) to be consumers and producers of research. Knowing that new information and technologies are always being discovered, inherent throughout the program is the overarching goal to train psychologists committed to being life-long learners.

The dual emphasis of the scientist-practitioner model is more important than ever in this era of changing roles for school psychologists, and it is the primary goal of the program to provide rigorous training in both of these important roles. The scientist-practitioner role has been a longstanding tradition within psychology (Boulder Conference, 1949; Thayer Conference, 1954); however, the tenets of this model fit nicely with the most innovative of practices. Our training practices follow the principles of the National Association of School Psychologists’ (NASP) Practice Model (2020) by training students with a solid basis of knowledge in psychological and educational principles and the application of science and the scientific method. Additionally, one of the approaches to practice that is emphasized in the program is the data-based collaborative problem-solving approach (e.g., Deno, 2002; NASP, 2020; Song et al., 2014; Tilly, 2008).

The problem-solving approach by nature requires the integration of systematic scientific inquiry and service delivery in meeting the needs of children and adolescents. The program components including research experiences and requirements, courses, and practica allow our students to embody the scientist-practitioner model.

The scientist role is an important one to all professional psychologists. Students in the NIU School Psychology Program are trained to be both critical consumers of psychological research, so that they maintain the highest professional standards of practice, and active contributors to psychological and educational knowledge through the conduct of original research. The scientist role is emphasized throughout the program in multiple ways through a series of sequenced, cumulative, and integrated experiences and processes. Being housed within a comprehensive Ph.D. level Department of Psychology, the School Psychology Program provides its students
with rigorous, research-based training not only in the core areas of school psychology, but also in the basic psychological and educational foundation content areas that inform school psychology practice. For example, in addition to completing research-oriented course work from primary school psychology faculty, students also complete rigorous research-based course work from faculty in the other Ph.D. curricular programs within the department (e.g., Social, Developmental, Cognitive, Clinical). Students work closely with faculty mentors and advisors on the completion of a Master’s thesis and Ph.D. dissertation that make a substantial contribution to scientific knowledge. Less formally, students participate in multiple activities throughout the academic year that directly facilitate and model the scientist role. These include participation in ongoing faculty research projects as Research Assistants, participation as both attendees and presenters at a variety of departmental colloquium series (e.g., School Psychology Brownbags and Child Clinical-Developmental Brownbags), as well as participation in local, state, and national conferences and workshops. Please see Appendix D for a listing of recent presentations and publications involving students.

The practitioner role also is central to the functioning of most school psychologists. It is necessarily a diverse role, requiring skills in psychological and educational intervention, consultation, and assessment. Course work and practica experiences provide a synthesis of theory, research, and applied aspects of school psychology practice. The program is designed to train students as problem-solving professionals who are competent to work in multiple capacities on a wide range of problems encountered in educational and other applied settings. The school psychology program provides students with a comprehensive set of graduated practicum experiences beginning their second semester on campus and continuing until the capstone internship experience. It is during these experiences that students apply the knowledge and skills they have acquired in their academic courses and research to educational and clinical settings. The synthesis of theory, research, and practice forms the foundation of the scientist-practitioner model adopted by the NIU program.

The Department of Psychology offers a 90-hour Ph.D. degree with a specialization in school psychology. Students completing the Ph.D. program are eligible for the Illinois Professional Educator License (School Psychologist endorsement) from the Illinois State Board of Education and the Nationally Certified School Psychologist (NCSP) credential through NASP. The Program also provides all opportunities so that our students will be eligible for pursuing professional licensure as a psychologist in Illinois and other states, needing only postdoctoral hours and passing the EPPP to be eligible. The following goals, objectives, and competencies have been established for students in the Ph.D. program.

**KNOWLEDGE AND COMPETENCIES of the PROGRAM**

The School Psychology Program trains school psychologists who have Discipline Specific Knowledge (DSK) and Profession Wide Competencies (PWC) needed by health service providers, as communicated by the American Psychological Association. These knowledge areas and competencies are listed below, followed by the Program competencies which are aligned with the DSK and PWC.
APA Discipline-Specific Knowledge

Discipline-specific knowledge serves as a cornerstone of identity as a psychologist and orientation to health service psychology. Therefore, all students in accredited doctoral programs shall demonstrate knowledge in the discipline of psychology, broadly construed. This discipline-specific knowledge base shall include: 1) the history and systems of psychology, 2) basic knowledge in scientific psychology, 3) integrative knowledge in scientific psychology, and 4) methods of inquiry and research.

History and Systems of Psychology
• History and Systems of Psychology, including the origins and development of major ideas in the discipline of psychology.

Basic Content Areas in Scientific Psychology
• Affective Aspects of Behavior, including topics such as affect, mood, and emotion. Psychopathology and mood disorders do not by themselves fulfill this category.
• Biological Aspects of Behavior, including multiple biological underpinnings of behavior, such as neural, physiological, anatomical, and genetic aspects of behavior. Although neuropsychological assessment and psychopharmacology can be included in this category, they do not, by themselves, fulfill this category.
• Cognitive Aspects of Behavior, including topics such as learning, memory, thought processes, and decision-making. Cognitive testing and cognitive therapy do not, by themselves, fulfill this category.
• Developmental Aspects of Behavior, including transitions, growth, and development across an individual’s life. A coverage limited to one developmental period (e.g., infancy, childhood, adolescence, adulthood, or late life) is not sufficient.
• Social Aspects of Behavior, including topics such as group processes, attributions, discrimination, and attitudes. Individual and cultural diversity and group or family therapy do not, by themselves, fulfill this category.

Advanced Integrative Knowledge in Scientific Psychology.
• Advanced Integrative Knowledge of Basic Discipline-Specific Content Areas, including graduate-level scientific knowledge that entails integration of multiple basic discipline-specific content areas identified in Category 2 (i.e., integration of at least two of: affective, biological, cognitive, social, or developmental aspects of behavior).

Research Methods, Statistical Analysis, and Psychometrics
• Research Methods, including topics such as strengths, limitations, interpretation, and technical aspects of rigorous case study; correlational, experimental, and other quantitative research designs; measurement techniques; sampling; replication; theory testing; qualitative methods; mixed methods; meta-analysis; and quasi-experimentation.
• Statistical Analysis, including topics such as quantitative, mathematical modeling and analysis of psychological data, statistical description and inference, univariate and multivariate analysis, null hypothesis testing and its alternatives, power, and estimation.
• Psychometrics, including topics such as theory and techniques of psychological measurement, scale and inventory construction, reliability, validity, evaluation
Introduction
The Commission on Accreditation (CoA) requires that all trainees who complete accredited training programs, regardless of substantive practice area, degree type, or level of training, develop certain competencies as part of their preparation for practice in health service psychology (HSP).

I. Research
The CoA recognizes science as the foundation of HSP. Individuals who successfully complete programs accredited in HSP must demonstrate knowledge, skills, and competence sufficient to produce new knowledge, to critically evaluate and use existing knowledge to solve problems, and to disseminate research. This area of competence requires substantial knowledge of scientific methods, procedures, and practices. Trainees are expected to:

**Doctoral students:**
- Demonstrate the substantially independent ability to formulate research or other scholarly activities (e.g., critical literature reviews, dissertation, efficacy studies, clinical case studies, theoretical papers, program evaluation projects, program development projects) that are of sufficient quality and rigor to have the potential to contribute to the scientific, psychological, or professional knowledge base.
- Conduct research or other scholarly activities.
- Critically evaluate and disseminate research or other scholarly activity via professional publication and presentation at the local (including the host institution), regional, or national level.

II. Ethical and legal standards
This competency is required at the doctoral, internship, and post-doctoral levels. Trainees are expected to respond professionally in increasingly complex situations with a greater degree of independence across levels of training.

**Trainees at all levels** are expected to demonstrate competency in each of the following areas:
- Be knowledgeable of and act in accordance with each of the following:
  - the current version of the APA Ethical Principles of Psychologists and Code of Conduct;
  - relevant laws, regulations, rules, and policies governing health service psychology at the organizational, local, state, regional, and federal levels; and
- Recognize ethical dilemmas as they arise, and apply ethical decision-making processes in order to resolve the dilemmas.
- Conduct self in an ethical manner in all professional activities.

III. Individual and cultural diversity
Effectiveness in health service psychology requires that trainees develop the ability to conduct all professional activities with sensitivity to human diversity, including the ability to deliver high quality services to an increasingly diverse population. Therefore, trainees must demonstrate
knowledge, awareness, sensitivity, and skills when working with diverse individuals and communities who embody a variety of cultural and personal background and characteristics. The Commission on Accreditation defines cultural and individual differences and diversity as including, but not limited to, age, disability, ethnicity, gender, gender identity, language, national origin, race, religion, culture, sexual orientation, and socioeconomic status. The CoA recognizes that development of competence in working with individuals of every variation of cultural or individual difference is not reasonable or feasible.

Trainees at all levels are expected to demonstrate:

• an understanding of how their own personal/cultural history, attitudes, and biases may affect how they understand and interact with people different from themselves;
• knowledge of the current theoretical and empirical knowledge base as it relates to addressing diversity in all professional activities including research, training, supervision/consultation, and service;
• the ability to integrate awareness and knowledge of individual and cultural differences in the conduct of professional roles (e.g., research, services, and other professional activities). This includes the ability to apply a framework for working effectively with areas of individual and cultural diversity not previously encountered over the course of their careers. Also included is the ability to work effectively with individuals whose group membership, demographic characteristics, or worldviews create conflict with their own.

Trainees are expected to respond professionally in increasingly complex situations with a greater degree of independence as they progress across levels of training. Trainees are expected to:

Doctoral students:

• Demonstrate the requisite knowledge base, ability to articulate an approach to working effectively with diverse individuals and groups, and apply this approach effectively in their professional work.

IV. Professional values and attitudes
This competency is required at the doctoral and internship levels. Trainees are expected to respond professionally in increasingly complex situations with a greater degree of independence across levels of training.

Doctoral students and Interns are expected to:

• behave in ways that reflect the values and attitudes of psychology, including integrity, deportment, professional identity, accountability, lifelong learning, and concern for the welfare of others.
• engage in self-reflection regarding one’s personal and professional functioning; engage in activities to maintain and improve performance, well-being, and professional effectiveness.
• actively seek and demonstrate openness and responsiveness to feedback and supervision.
• respond professionally in increasingly complex situations with a greater degree of independence as they progress across levels of training.
V. Communication and interpersonal skills
This competency is required at the doctoral and internship levels. Trainees are expected to respond professionally in increasingly complex situations with a greater degree of independence across levels of training.

The CoA views communication and interpersonal skills as foundational to education, training, and practice in health service psychology. These skills are essential for any service delivery/activity/interaction, and are evident across the program’s expected competencies.

**Doctoral students and interns** are expected to:
- develop and maintain effective relationships with a wide range of individuals, including colleagues, communities, organizations, supervisors, supervisees, and those receiving professional services.
- produce and comprehend oral, nonverbal, and written communications that are informative and well-integrated; demonstrate a thorough grasp of professional language and concepts.
- demonstrate effective interpersonal skills and the ability to manage difficult communication well.

VI. Assessment
This competency is required at the doctoral and internship levels. Trainees are expected to respond professionally in increasingly complex situations with a greater degree of independence across levels of training. Trainees demonstrate competence in conducting evidence-based assessment consistent with the scope of Health Service Psychology.

**Doctoral students and Interns** are expected to:
- Demonstrate current knowledge of diagnostic classification systems, functional and dysfunctional behaviors, including consideration of client strengths and psychopathology.
- Demonstrate understanding of human behavior within its context (e.g., family, social, societal and cultural).
- Demonstrate the ability to apply the knowledge of functional and dysfunctional behaviors including context to the assessment and/or diagnostic process.
- Select and apply assessment methods that draw from the best available empirical literature and that reflect the science of measurement and psychometrics; collect relevant data using multiple sources and methods appropriate to the identified goals and questions of the assessment as well as relevant diversity characteristics of the service recipient.
- Interpret assessment results, following current research and professional standards and guidelines, to inform case conceptualization, classification, and recommendations, while guarding against decision-making biases, distinguishing the aspects of assessment that are subjective from those that are objective.
- Communicate orally and in written documents the findings and implications of the assessment in an accurate and effective manner sensitive to a range of audiences.

VII. Intervention
This competency is required at the doctoral and internship levels. Trainees are expected to respond professionally in increasingly complex situations with a greater degree of independence
across levels of training. Trainees demonstrate competence in evidence-based interventions consistent with the scope of Health Service Psychology. Intervention is being defined broadly to include but not be limited to psychotherapy. Interventions may be derived from a variety of theoretical orientations or approaches. The level of intervention includes those directed at an individual, a family, a group, an organization, a community, a population or other systems.

**Doctoral students** are expected to demonstrate the ability to:
- establish and maintain effective relationships with the recipients of psychological services.
- develop evidence-based intervention plans specific to the service delivery goals.
- implement interventions informed by the current scientific literature, assessment findings, diversity characteristics, and contextual variables.
- demonstrate the ability to apply the relevant research literature to clinical decision making.
- modify and adapt evidence-based approaches effectively when a clear evidence-base is lacking.
- evaluate intervention effectiveness, and adapt intervention goals and methods consistent with ongoing evaluation.

**VIII. Supervision**
This competency is required at the doctoral and internship level. The CoA views supervision as grounded in science and integral to the activities of health service psychology. Supervision involves the mentoring and monitoring of trainees and others in the development of competence and skill in professional practice and the effective evaluation of those skills. Supervisors act as role models and maintain responsibility for the activities they oversee. Trainees are expected to:

### Doctoral students:

### IX. Demonstrate knowledge of supervision models and practices.

**X. Consultation and interprofessional/interdisciplinary skills**
This competency is required at the doctoral and internship level. The CoA views consultation and interprofessional/interdisciplinary interaction as integral to the activities of health service psychology. Consultation and interprofessional/interdisciplinary skills are reflected in the intentional collaboration of professionals in health service psychology with other individuals or groups to address a problem, seek or share knowledge, or promote effectiveness in professional activities. Trainees are expected to:

### Doctoral students
- Demonstrate knowledge and respect for the roles and perspectives of other professions.
- Demonstrates knowledge of consultation models and practices.
Program Goals, Objectives, and Student Competencies

Goal 1. To prepare entry-level psychologists who will have a solid foundational understanding of broad psychological principles.

Objective 1. Students will acquire knowledge of social and emotional, biological, cognitive/instructional, and developmental aspects of human behavior.
   - Competency 1A. Students will demonstrate knowledge of social and emotional aspects of human behavior.
   - Competency 1B. Students will demonstrate knowledge of biological bases of human behavior.
   - Competency 1C. Students will demonstrate knowledge of cognitive/instructional, and developmental aspects of human behavior.

Goal 2. To prepare entry-level psychologists who will understand the profession and the professional practice of school psychology and will seek learning experiences throughout their career.

Objective 2. Students will acquire an understanding of the evolution of and key issues in the practice of school psychology.
   - Competency 2A. Students will develop an understanding of the history, roles, and functions of school psychologists.
   - Competency 2B. Students will develop and demonstrate an understanding of the professional and ethical standards and legal issues relevant to school psychology practice.

Objective 3. Students will learn to practice as socially competent professionals who are effective communicators, collaborators, and life-long learners.
   - Competency 3A. Students will demonstrate effective formal written and oral communication skills related to the practice of school psychology.
   - Competency 3B. Students will demonstrate appropriate, culturally-competent, professional behavior and social competence in their practice of school psychology.
   - Competency 3C. Students will demonstrate a life-long learner disposition by seeking non-required learning opportunities and experiences.
   - Competency 3D. Students will develop competency using relevant information technology to facilitate the practice of school psychology.
   - Competency 3E. Students will develop competency in using evidence-based supervision methods to supervise psychologists and other professionals. *2021

Goal 3. To prepare entry-level psychologists who use appropriate ecologically-based, empirically-validated assessment and intervention approaches for systems and individuals.

Objective 4. Students will take an ecological, evidence-based, problem-solving approach in their assessment of systems and individuals.
   - Competency 4A. Students will develop and demonstrate skills in empirically-validated cognitive and adaptive behavior assessment procedures to meet the needs of diverse populations.
Competency 4B. Students will develop and demonstrate competency in the assessment of academic skills and performance using an ecological approach and empirically-validated methods to meet the needs of diverse populations.

Competency 4C. Students will develop and demonstrate skills in the assessment of personality, social-emotional functioning, and behavior using an ecological approach and empirically-validated methods to meet the needs of diverse populations.

Objective 5. Students will take an evidence-based, problem-solving approach in their prevention and intervention practices with systems and individuals.

  Competency 5A. Students will develop and demonstrate skills in the delivery and evaluation of evidence-based counseling interventions for social-emotional issues appropriate to diverse populations.
  Competency 5B. Students will develop and demonstrate skills in the delivery and evaluation of evidence-based consultative interventions for academic, social-emotional, behavioral, and other issues appropriate to diverse populations.
  Competency 5C. Students will develop and demonstrate skills in the delivery and evaluation of evidence-based direct interventions for academic, behavior, and social-emotional issues appropriate to diverse populations.
  Competency 5D. Students will develop and demonstrate an evidence-based, problem-solving approach to the delivery of school psychological services involving a wide variety of education-related issues to meet the needs of diverse populations.
  Competency 5E. Students will develop and demonstrate an evidence-based, problem-solving approach to the design, evaluation, and implementation of system-wide prevention/intervention approaches and of crisis intervention procedures.

Goal 4. To prepare entry-level psychologists who will be consumers and producers of research.

Objective 6. Students will acquire advanced understanding and skill in the process of scientific inquiry in research and practice.

  Competency 6A. Students will develop advanced skills in the principles of research design, statistics, and measurement and the interpretation and evaluation of research.
  Competency 6B. Students will apply research and evaluation skills in the practice of school psychology.

Objective 7. Students will contribute work to the scientific community through publications and presentations.

  Competency 7A. Students will propose, conduct, and complete original research that makes a substantial contribution to scientific inquiry.
  Competency 7B. Students will develop skills in explaining and presenting research findings.

Planned Ph.D. Program of Study

The planned Ph.D. program of study is provided below, though course availability, staffing issues, and other changes may cause changes in this plan. In addition to courses, other significant program milestones are also noted with an *.

**Fall Semester 1:**
PSYC 604 – Analysis of Variance and Hypothesis Testing in Psychological Research  
PSYC 639 – Ethics, Law, and Professional Issues in School Psychology  
PSYC 640 – Theory and Assessment of Intellectual Functioning  
PSYC 517 – Principles of Behavior Modification OR SESE 515 Foundations of Applied Behavior Analysis  
PSYC 690 – Psychological Research  
*PSYC XXX - grant class as applicable*

*Work with research mentor on thesis ideas  
*Complete doctoral program of courses form

**Spring Semester 1:**
PSYC 606 – Correlation and Regression Analysis in Psychological Research  
PSYC 611 – Cognitive Psychology I  
PSYC 646 – Psychological Assessment of Children (Behavioral, Social, Emotional)  
PSYC 653 – Practicum in School Psychology (First Year)  
PSYC 595 – Seminar: Culturally and Linguistically Appropriate Academic and Literacy Assessment, Curriculum, and Instruction  
PSYC 690 – Psychological Research  
*ISPA conference – required attendance (January or February)  
*NASP conference  
*Continue thesis proposal development

**Summer Semester 1:**
PSYC 699 – Thesis  
*Complete second-year Competency Exam (August)  
*APA conference

**Fall Semester 2:**
PSYC 620 – Experimental Social Psychology  
PSYC 595 – Seminar: Mental Health in Schools – Tier 1 & 2  
PSYC 645 – Developmental Psychopathology  
PSYC 653 – Practicum in School Psychology (Second Year)  
PSYC 699 – Thesis  
PSYC 690 – Psychological Research  
*Thesis should be proposed by the end of the semester
Spring Semester 2:
SESE 603 – (formerly 560) - Functional Analysis for the Special Education Teacher OR
    SESE 708 - Advanced Behavior Assessment and Functional Analysis
PSYC 647 – Psychological Interventions with Children and Their Families
PSYC 648 – Consultative Interventions in School and Community Settings
PSYC 653 – Practicum in School Psychology (Second Year)
PSYC 676 – Social-Personality Development
PSYC 690 – Psychological Research
PSYC 699 – Thesis
*ISPA conference – required attendance (January or February)
*NASP conference

Summer Semester 2:
PSYC 653 Parent Training Practicum
PSYC 699 – Thesis
*APA conference

Fall Semester 3:
PSYC 653 – Practicum in School Psychology (Advanced)
PSYC 699 – Thesis
PSYC 690 – Psychological Research
Cognate Course
*Candidacy exam

Spring Semester 3:
Psychology Tool Course
PSYC 528 – History of Psychology
PSYC 653 – Practicum in School Psychology (Advanced)
PSYC 699 – Thesis
PSYC 690 – Psychological Research
*NASP conference
*Dissertation proposal
*Candidacy exam

Summer Semester 3:
Psychology Tool Course
PSYC 699 – Thesis
Cognate Course
*Candidacy exam
*Start working on AAPI application
*APA conference
*Dissertation proposal
Fall Semester 4:
Psychology Tool Course
PSYC 603 – Biopsychology
PSYC 799 – Dissertation
PSYC 653 – Practicum in School Psychology (Advanced)
PSYC 690 – Psychological Research
*Complete AAPI Application for Internship typically by Nov. 1
*Must take/pass ISBE School Psychology Content Exam before internship begins

Spring Semester 4:
PSYC 799 – Dissertation
PSYC 653 – Practicum in School Psychology (Advanced)
PSYC 690 – Psychological Research
Cognate Course
*NASP conference
*Must take/pass ISBE School Psychology Content Exam before internship begins
*Internship Interviews (December/January) and Match Day (typically February)

Summer Semester 4:
PSYC 799 – Dissertation
*APA conference
*Students doing a 12-month internship must be registered the summer they are doing internship (i.e., if the internship begins prior to July 15, register for the summer before the fall and spring semesters. If internship begins after July 15, register for the summer following fall and spring semesters. It is most common for students to register for internship the “second” summer.)

Fall and Spring Semester 5:
PSYC 656 – Internship
PSYC 799 – Dissertation
*On-campus intern meetings (Fall, Spring)
*Complete portfolio
*Obtain Illinois Educator License (School Psychology)

Summer Semester 5:
PSYC 656 – Internship (unless registered for internship during prior summer semester)
*If necessary, students should register for internship credits or dissertation credits until both are complete.

In addition to the content related courses and required practica, students also enroll in PSYC 690: Psychological Research during each semester they are in the program. PSYC 690 is designed to develop students' research and professional skills related to their areas of specialty and is graded on a satisfactory - unsatisfactory basis. **Students only register for 690 if they have not yet proposed their dissertation.** The student's assigned faculty mentor will provide ongoing advisement regarding necessary course work, practicum experiences, and educational licensure requirements.

Ph.D. Program Requirements

I. Residency Requirement

The Ph.D. program requires each student to complete at least three academic years of full-time graduate study at Northern Illinois University prior to awarding the doctoral degree. For students entering post-Master’s, we require each student to complete at least two academic years of full-time graduate study at Northern Illinois University. All students must complete a 12 month, full-time (or equivalent) internship prior to being awarded the Ph.D.

II. Educational Licensure Course Work Requirements

Listed in the Doctoral Course Work Requirements Table are the course requirements for our doctoral program. A minimum of 60 semester hours at the graduate level is required for completion of the educational license program and 90 semester hours are required for the doctoral degree. The School Psychology content test for Illinois, must be taken and passed before starting internship. Additional information can be obtained from the Illinois Certification Testing System (ICTS) webpage. Students are required to request their scores be sent to NIU.

III. Department Foundation Requirements

Students must also complete the following required foundation courses in the Psychology Department (totaling 15 credits). Courses taken to fulfill foundation requirements may be used to fulfill program requirements as well. Students should consult the Graduate Student Manual for additional information on the department foundation requirements. These are completed as part of the program requirements as required School Program courses are in bold. Thus, students meet these breadth requirements via completion of the required School Program courses.

1. PSYC 604 – Analysis of Variance and Hypothesis Testing in Psychological Research
2. PSYC 606 – Correlation and Regression Analysis in Psychological Research
3. Three courses selected from the following: (Bold = program requirement)
   - PSYC 611 – Cognitive Psychology I
   - PSYC 603 – Biopsychology
   - PSYC 620 – Experimental Social Psychology
   - PSYC 645 – Developmental Psychopathology
   - PSYC 665 - Behavioral Development

IV. Breadth Requirements (Discipline Specific Knowledge)

Students will complete course work in the following five domains integral to the profession of school psychology. Courses taken to complete other program objectives and competencies may be used to complete breadth requirements. Department courses listed below are designed to meet the breadth requirements and are required for the doctoral program and represent how we incorporate APA’s required Discipline Specific Knowledge.

A. Biological Aspects of Behavior: (e.g., physiological psychology, comparative psychology, neuropsychology, sensation, psychopharmacology).
   - PSYC 603 - Biopsychology
B. Cognitive Aspects of Behavior: (e.g., learning, memory, perception, cognition, thinking, motivation, emotion).
   PSYC 611 – Cognitive Psychology I

C. Social Aspects of Behavior: (e.g., social psychology, cultural, ethnic, group processes, sex roles, organizational and systems theory).
   PSYC 620 – Experimental Social Psychology

D. Affective and Developmental Aspects of Behavior: (e.g., personality theory, human development, individual differences, abnormal psychology).
   PSYC 645 – Developmental Psychopathology
   PSYC 676 – Social Personality Development

E. History and Systems of Psychology:
   PSYC 528 – History of Psychology

V. Tool Requirement

Upon admission into the doctoral program, students must specify the means by which they intend to satisfy the doctoral research tool requirement (this is typically done through two additional statistics courses beyond PSYC 604 and PSYC 606). Courses used to satisfy the tool requirement must be approved by the student’s advisor, Director of Graduate Studies, and the office of the dean of the Graduate School. The tool request approval form can be obtained from the Director of Graduate Studies. Although the following list is not exhaustive (i.e. students may petition to have other courses approved), the following courses typically are approved. You should always check with your advisor.

   PSYC 607 Psychometric Techniques
   PSYC 671D Studies in General Psychology – D Quantitative Methods (varies)
   PSYC 710 Multivariate Data Analysis in Psychological Research
   PSYC 712 Structural Equation Modeling in Psychological Research
   ETR 560 Computer Data Analysis (less recommended)
   ETR 562 Applied Categorical Data Analysis
   ETR 590 Workshop in Research and Assessment (e.g. MPLUS “smash up” series)
   ETR 722 Methods of Multivariate Analysis
   ETR 724 Multilevel Modeling
   ETR 735 Theory of Measurement
   ETR 790 Workshop in Research and Assessment (Hierarchical Linear Modeling)
   ETR 790 Workshop in Research and Assessment (Multiple Linear Regression)
   ETR 790 Workshop in Research and Assessment (Structural Equation Modeling in R)
VI. Ph.D. Specialization Cognate

Students will complete course work in an approved area of specialization consisting of a minimum of 3 courses (i.e., 9 credit hours) conceptually integrated to provide the student in-depth knowledge/skills in an area related to the field of school psychology. These courses may be identified and completed at any time during the student's program of study, and two of the three courses may fulfill other departmental and/or program requirements. Provided below is a non-exhaustive list of specialization areas with courses that would meet the cognate requirement. These are provided as examples. Students must complete the "Cognate Completion Form" upon fulfillment of this requirement and turn it into the Program Director.

**Assessment:**
- PSYC 640 - Theory and Assessment of Intellectual Functioning
- PSYC 646 - Psychological Assessment of Children
- LTIC 547: Assessment of Language-Minority Students

**Counseling:**
- PSYC 647 - Psychological Intervention with Children and Their Families
- COUN 593 - Crisis Intervention
- HDFS 695 - Approaches to Marriage and Family Therapy

**Cultural Diversity:**
- COUN 565: Multicultural and Social Justice Counseling
- LTIC 547: Assessment of Language-Minority Students
- COUN 766: Human Sexuality Counseling

**Trauma:**
- COUN 593 - Crisis Intervention
- COUN 715 - Concepts in Trauma-Informed Counseling
- COUN 716 – Counseling for Complex Trauma

**Education Law:**
- PSYC 639 – Ethics, Law, and Professional Issues in School Psychology
- LEEA 525 – Education Law I
- LEEA 725 – Special Education: Leadership and the Law

**TOTAL**  
112-124

*Courses with an * are also Departmental Foundation Courses (total of 15 credits required)*

**NOTES:**

- **PSYC 102 TAs also register for PSYC 681A (1-3 CH).**
- **You must register for 690 (1-3 CH) every fall and spring semester until the formal approval of your dissertation proposal.**
- **Once you register for 699 (Thesis) or 799 (Dissertation), you must register for that course (at least one credit) each subsequent semester (including summer) until your Thesis or Dissertation has been formally approved by the Grad School. It is expected that the number of PSYC 690, PSYC 699, or 799 hours in which a student is enrolled should reflect the amount of work undertaken that semester. The dissertation (799) will account for approximately two full semesters of the 90-hour total (18 hours minimum, 24 maximum). Graduate students holding full or partial assistantships, fellowships, or similar assignments during a regular semester are required to enroll in 12 semester hours of courses by the department unless permission is secured for an underload. The number of graduate- level semester hours of independent study (PSYC 685) on the 90-hour program of study may not exceed 15.**
VII  Second-year Competency and Candidacy Exams

Second-year competency exam. In addition to completing the above curricular requirements, all students with a specialization in school psychology must complete a second-year Competency Examination. The examination will be administered in a "closed-book" format in a computer lab, and students may not refer to any notes, books, articles, etc. during the examination. Students will be given two hours to write answers to questions covering two domains:

1. Legal, Ethical, and Professional Practice
2. Individual, Linguistic, and Cultural Diversity-Informed Assessment

Students should obtain a copy of the reading list from the program coordinator (see Appendix A). The reading list is intended to provide a basic background for questions asked on the examination. The list is not exhaustive, however, and students are encouraged to utilize information gained through course work and independent study.

Students specializing in school psychology must take the exam for the first time in the late summer before the second year (prior to fall classes). Students are given two opportunities to take the exam and are graded as follows:

High Pass - Represents an outstanding level of performance and is necessary for a student to be admitted to the Ph.D. program.

Pass - Represents a high level of performance and is necessary for completion of the Master's degree and educational licensure as a school psychologist. The student will not be eligible for continuation in the Ph.D. program if this is the highest grade achieved on both attempts at the examination.

Fail - The student has not passed the examination. If this is the grade on the student's first attempt, the student must retake the examination. If no higher grade is achieved, the student will not be allowed to continue in the program.

Please note, the Graduate School combines the completion of the Competency Exam with the Oral Defense for Thesis track students. This means any progress reports or audits will not show the Competency Exam has been completed until AFTER the student has also successfully defended their Thesis. Basically, both Comps and Thesis defense must be done before the requirement will be checked off.

Candidacy exam. When students have completed most of the doctoral course work (except dissertation research), they will take the written candidacy examination. The candidacy exam samples the student’s knowledge and ability to integrate theory and research relevant to the student’s dissertation area of interest. The exam is comprised of three short take-home papers related to the student’s area of research interest. The following procedures are followed:

(a) A committee of faculty is formed that is related to the student’s dissertation interests.

(b) The student (in consultation with his/her advisor) formulates 5 questions that are relevant to his/her dissertation research interests and which could form the basis for a short paper.
(c) The student develops a list of representative references that address each question. The separate reference list for each question will help the student determine if the question might be too broad or too narrow, for example.

(d) The committee meets to review/revise the questions submitted and formulates the final three questions for the student to answer. Suggestions regarding the reading list also might be given.

(e) The student is instructed to write a short paper (8 to 10 pages) addressing each of the questions, and a due date, three months from the start date, is specified.

(f) When the student completes and turns in the papers, the committee members each independently review each paper, grading them as exceptional, satisfactory, or unsatisfactory. The committee then meets to discuss the paper responses. If any paper is unsatisfactory, the student is given one opportunity to re-write that paper (or any other failed responses) to obtain an overall Pass on the Candidacy exam.

VIII. Practicum Experiences

The school psychology program provides students with a comprehensive set of graduated practicum experiences beginning their second semester on campus and continuing throughout their graduate career. It is during these experiences that students apply the knowledge and skills they have acquired in their academic course work to educational and clinical settings. All clinical hours spent in First, Second, and Doctoral Practica and on Internship must be documented using Time2Track. See Program Director for more information. The program director is responsible for selecting and placing students in practicum sites to ensure the placement, diversity of activities, quality of supervision and collaboration with the program faculty and site supervisor are appropriate for the candidates, and that the site provides them with the best possible experience, and effectively prepares them for internship and professional practice. In addition, located within both the first and second year practicum syllabi, is a list of experiences that correspond to several NASP objectives which the student is expected to participate in. This list is provided to practicum site supervisors to ensure that students are getting the experiences necessary to develop their professional skills and competencies.

Prior to beginning practicum, students will have a background check according to the procedure at each school where they train/work during the program. Students will have to go through the process each year at each new district, following what is likely their new employee procedures. This will often (usually) include a fee that students will have to pay. One reason for this procedure is that schools will be the owners of the CBC information and they will decide on their own whether or not a conviction warrants exclusion from their schools and classrooms.

First-Year Practicum (75 clock hours)
The first-year practicum experience begins the spring semester of the first year. Under the university-based supervision of a licensed, Ph.D. school psychology faculty member, students are required to observe and participate for a minimum of 75 clock hours in the public schools, while under the supervision of a practicing school psychologist. This semester involves work in regular education as well as special education classes in elementary, middle school, and high school buildings, and includes involvement with a practicing school psychologist in "on the job" observation and supervised experiences. Additionally, students attend a weekly seminar in which
their activities and observations are reviewed and discussed. Students are also evaluated by their site supervisor at the end of the semester. These evaluations are reviewed with the practicum instructor during individual conferences to provide students with feedback, and to evaluate their performance and development of professional characteristics and their progress towards program competencies. Speakers such as special-education teachers, administrators, and health-care professionals may also make presentations to the practicum group.

Second-Year Practicum (350 clock hours)
The second-year practicum consists of a minimum of 350 clock hours and is designed to provide students with more intensive experiences in assessment, consultation, and treatment interventions. Under the university-based supervision of a licensed, Ph.D. school psychology faculty member, students are placed in a regional public school setting where they engage in assessment, intervention, and consultation with teachers and parents regarding student's academic, social, and emotional problems, using a problem-solving approach. Students are supervised on site by educationally (and sometimes professionally) licensed supervisors. All students enrolled in the second-year practicum participate in weekly group supervision meetings with other practicum students and the university-based supervisor. Similar to first-year practicum, students are evaluated by their site supervisor at the end of each semester and these evaluations are reviewed to evaluate professional development and progress towards program competencies.

Second-Year Summer Parent Training Practicum. Starting in the summer of 2020, students also take an additional practicum course focused on parent training (PSYC 653: Parent Training). The goal of this practicum experience is to have students provide a parent training intervention to parents in the Psychological Services Center. Due to pandemic restrictions the last two summers, this practica was conducted in an alternative format (via videoconferencing) with role play. The students lead a six-session, manualized parent training group focused on addressing challenging behaviors and is targeted to parents of children ages 0-6. Students are evaluated by the supervisor on their delivery of the parent training content, their integrity to the program manual, and their engagement of the group participants. The students also receive feedback from the participants in the parent training group (currently other students in the course). Students are also evaluated through a role play of an individual consultation session with a parent.

Third- and Fourth-Year Advanced Practica (700 clock hours)
The third and fourth-year Ph.D. practica consists of a minimum of 350 clock hours each year (third and fourth years) and typically involves the student being placed one day a week in a school or clinical setting. The specific content of the Ph.D. practica is individualized for each student based on a student’s interests and professional goals. All practicum placements must be approved by the program director. The purpose of the practicum is to allow students to adopt an authentic, professional role within a school or clinical setting. Under the supervision of an appropriately credentialed (professional licensed), doctoral-level practicing psychologist, the student will provide assessment, counseling, and consultation services to students, parents, or teachers. Students will also engage in supervision of less experienced school psychology students during the Ph.D. practicum. Under the direction of program faculty, the student will review key literature on supervision and will assist more junior students as they complete assessment, consultation, and counseling experiences. Students will also participate in serving one client in the Psychological Services Center (PSC) in the spring semester of third year. Fourth year students will supervise that experience. At the end of each semester of Advanced Practicum, students are evaluated by their site supervisors. Please note, advanced practicum students are responsible for obtaining personal liability insurance prior to working at their placement.
IX. Thesis and Dissertation

An essential aspect of the Ph.D. program is completion of the M.A. Thesis and Ph.D. Dissertation. Both the thesis and dissertation are research-based projects that represent a substantial contribution to the field. The completion of these projects provides students the opportunity to pursue in-depth study in an area of specialized professional interest.

Note that if a student enters the program with a master’s degree in psychology that included a quantitative thesis, that thesis will be evaluated by a committee of faculty and the Director of Graduate Studies to determine if it meets our criterion and if not, another qualifying thesis or “in lieu of thesis” research product will be completed.

Students pursuing the Ph.D. will become engaged in thesis and dissertation work early in the program. Throughout the first year, students will develop his or her thesis proposal with the faculty advisor. Starting with the 2013-14 incoming cohort, research timeline guidelines were implemented (see below). Students are expected to propose the Master’s Thesis by spring of second year and defend by February of third year. Students then do Candidacy exams and begin discussing the dissertation project which may be an extension of the thesis project under the supervision of the thesis director. However, students may not formally name a dissertation director until they have completed the departmental tool requirement (see more detailed description in Tool Requirement section). Students are enrolled in PSYC 699 (Thesis) or 799 (Dissertation) although, if in a semester they are not proposing or defending, students may be enrolled in PSYC 685 (Independent Study) to reflect work on their research.

Students will use ProQuest when formally submitting their thesis and dissertation. The Thesis and Dissertation Office has specific formatting guidelines that can be found on their site, along with other helpful information http://go.niu.edu/thesis. Please note, if the documents are not formatted to the specific guidelines, the submission will be rejected, and graduation may be delayed.

Goals and Deadlines for Research
In an effort to provide guidance, structure, and support, the faculty are implementing the following Goals and Deadlines for Research. These goals/deadlines are meant to be supportive and to help students keep research progress as a top priority.

Propose M.A. Thesis
Aspirational Goal: December 1 of second year
Expected Deadline: April 1 of second year
Remediation Deadline: September 1 of third year

Defend M.A. Thesis
Aspirational Goal: October 1 of third year
Expected Deadline: February 1 of third year
Remediation Deadline: July 1 before fourth year

Take and Pass candidacy exams
Within five months after thesis defense date.

Propose Dissertation
Aspirational Goal: July 1 before fourth year
Expected Deadline: October 1 of fourth year (prior to internship application/required to be able to apply for internship [4th year] and go on internship fifth year)
Remediation Deadline: May 1 of fourth year (no internship fifth year)

**Defend Dissertation**
Aspirational Goal: October 1 of fifth year
Expected Deadline: February 1 of fifth year
Remediation Deadline: August 1 of sixth year

**Remediation Deadlines:** There may be natural consequences to not making the Expected Deadline. If, in addition, a student does not meet the Remediation Deadline, the student and advisor must draft a remediation plan to be presented to the full School Psychology Faculty.

X. Internship

The internship is the culminating experience in school psychology graduate preparation. Students are eligible to apply for internships following completion of all course work and practica experiences, although they are strongly encouraged to complete the dissertation proposal prior to the internship experience. Students **must complete the AAPI application by Dec 1** (Application for Psychology Internships) as part of the search process regardless of whether or not they plan to seek an AAPI or APA internship (see [www.appic.org](http://www.appic.org)).

Interns enroll for at least 1 semester hour of credit each fall and spring semester, and 1 credit in the summer. All students are enrolled in a Blackboard Internship course webpage prior to starting internship. This Blackboard course provides access to all of the essential paperwork and communication necessary during the internship year.

The internship should include a comprehensive set of experiences through which the student integrates the knowledge and applied skills that entail school psychology practice. The internship should provide a wide range of experiences including assessment, direct intervention, and consultation activities on behalf of diverse populations of children, adolescents, or their families.

The internship will involve a full time, 12-month experience **(minimum of 2000 clock hours)** within a school or appropriate clinical setting under the **supervision of an appropriately credentialed (professional licensed), doctoral-level psychologist.** An average of 2 hours per week of on-site supervision is also required for students during the internship year. Internship hours are tracked using an online tracking system. For the past several years, our program has used the system “Time2Track” to document all hours completed during the internship.

Students in an APA accredited or APPIC approved site will utilize their site’s evaluation plan. Students on internship will attend on-campus seminars once each semester or virtually. Students and the intern sites are monitored by program faculty using online logs and communication and through evaluations by site supervisors completed twice each year and shared with and monitored by the Program Director.

Almost all NIU School Psychology Ph.D. students have secured a match in the APPIC internship match for an APA-accredited internship if desired and if they ranked APA accredited placements highly. If an internship is not APA accredited, it must conform to the Council of Directors of School Psychology (CDSPP) Doctoral Level Internship Guidelines (2017). These guidelines can be found...
in detail (Appendix C) but include (among other requirements): (a) the intern spending at least 25% of time in providing direct (face-to-face) psychological services, (b) the internship site have a written statement/brochure stating goals, content, clear expectations, and due process procedures of their internship training program, (c) a licensed, doctoral-level psychologist is present at the internship site, (d) at least two hours per week of individual supervision take place with the licensed psychologist, (e) at least two additional hours per week of scheduled group or individual supervision by appropriately credentialed health service, and (f) the intern have regularly scheduled, supervised training activities with other psychology interns.

A contract indicating all CDSPP guidelines will be followed must be signed by the internship site if not APA accredited.

XI. Portfolio

As part of the evaluation process, students are to develop a portfolio of performance-based products related to their graduate training. Although students receive evaluation feedback from faculty and supervisors throughout their graduate experience, the portfolio assessment is intended to enable students to monitor their progress on internship. The final result of the portfolio assessment will be a collection of “best-work” performance-based products that serve to document the student’s completion of program competencies for both faculty evaluators and outside judges, such as future employers.

The specific contents of the portfolio will be unique to each student but should provide evidence of graduate performance in relation to the NIU school psychology program competencies. Items as assessment, therapy, and consultation reports, meeting agendas, professional development handouts, letters of reference, and internship logs would be appropriate components of the portfolio. In addition to individual pieces of evidence from internship for each competency, students are required to submit two formal case studies to be evaluated using a Case Study Rubric. One case study should be a behavioral case and one case study should be an academic case.

Evaluation of students’ portfolios will be conducted by program faculty prior to the completion of the internship experience. Additional information about the content, procedures, and evaluation of student portfolios can be found in Appendix B: Portfolio Assessment Procedures.
Ongoing Student Advisement and Involvement

Advisement

At admission to the program, each student is assigned a faculty mentor. This mentor will coordinate annual student evaluations, serve as a resource regarding scheduling issues and, in general, be available to assist students in any area of their graduate training. It is expected that students will meet with their assigned mentor regularly each semester (typically every other week). Additionally, soon after admission to the program, entering students will become involved in a student mentoring program in which they are assigned to an advanced student in school psychology. The names and phone numbers of participating students are exchanged so that new students may quickly establish contacts with other students in the department.

During the year, students are strongly encouraged to attend a variety of department sponsored activities, such as brown-bag lunches, open lab meetings, department colloquia, intern presentations, and state/regional workshops and conferences. These activities are viewed as an important aspect of students’ development into scientist-practitioners who continue to engage in professional growth activities. During these activities, students will have an ample opportunity to discuss informally topics relating to the program and profession with other students, faculty, and members of the professional community. Program faculty maintain an "open door" policy, and students are strongly encouraged to schedule additional meetings with their faculty mentor as needed.

Brown-Bag Seminars

Throughout each fall and spring semester, the School Psychology Program hosts a series of brown-bag seminars (every other week) intended to provide a forum for students and faculty to present school psychology research and information on topics that relate to the field. Students can present thesis or dissertation work, guest presenters share their knowledge on current topics, and program issues are sometimes discussed. Students are invited to bring their lunches and participate in the presentations and discussions. Attendance is required for all on-campus students. Often the School Psychology Student Organization (SPSO) meets on the "off" week from the brownbag, so students are encouraged to keep the scheduled time free each week.

School Psychology Student Organization

The School Psychology Student Organization (SPSO) is run by graduate students in the School Psychology Program. This organization is affiliated with the American Psychological Association’s (APA), Student Affiliates in School Psychology (SASP) organization, and also the National Association of School Psychologists’ (NASP) Student Leader Program. The Organization serves several functions including increased communication among students, a formal method to communicate with program faculty, a forum for formal presentations, a way to fundraise for program events, and a group to organize social events. Students in previous years have been involved in organizing “in-service days,” planning and conducting large-scale community trainings, presenting to undergraduates about the field of school psychology during School Psychology Awareness Week, hosting an alumni event at the Illinois State Psychology Association (ISPA) conference, and planning social events.
Professional Involvement

Students are encouraged to be involved with the profession of School Psychology while in graduate school. This is encouraged via joining professional organizations such as the American Psychological Association (APA) Division 16, the National Association of School Psychologists (NASP), and the Illinois School Psychologists Association (ISPA). **Students are required to be members of at least one of these organizations each year.** Students are also encouraged to attend and/or present at local, state, and national conferences. Specifically, students are **required** to attend ISPA each year, are strongly encouraged to attend NASP, and are encouraged to attend APA. See Appendix D: Student Involvement in Publications and Presentations.

Student Assessment

Requirements for Sufficient Progress

Students are expected to maintain sufficient progress in the program and are evaluated via several methods described below. To be considered to be making adequate progress students must (a) maintain an average GPA of 3.0, (b) pass the Competency Exam, (c) obtain a grade of B or higher in all practicum courses and in courses designated for APA Discipline Specific Knowledge or Profession-Wide Competencies, (d) obtain no more than 6 credits with a grade of C or lower in any courses, (e) demonstrate adequate legal/ethical and professional responsibilities with no serious ethical violations, (f) demonstrate adequate professional behavior and social skills, and (g) meet expected research timelines.

Students’ progress in their professional development as school psychologists is monitored closely by faculty throughout the program. This includes formal assessment procedures such as course grades, exams, practicum and internship supervisor evaluations, research projects, and annual evaluations. It also includes less formal observation of students’ performance during such activities as assistantships, presentations, and interactions with both NIU and other professional colleagues. Students also complete a self-assessment of their progress each year in the program. All of these procedures are designed to allow the program to assess candidates’ professional work characteristics/dispositions on a continuing basis.

Annual Evaluation

Near the end of each academic year, each student's progress during the current year is evaluated by the school psychology program faculty. This process is initiated by students completing an Annual Report of Student Progress in which they summarize their educational activities and achievements during the past year. The progress of each student is then evaluated on such dimensions as: performance in course work, practica, assistantships, research, and professional conduct. Students receive written evaluation feedback regarding their performance in the program, and they are encouraged to meet with the program coordinator and/or advisor to discuss their performance during the year.

Students may request a re-consideration of their annual evaluation. Such requests should be made in writing to the coordinator of the program within 30 days of receipt of the evaluation. Students may also provide a written response to the annual evaluation for inclusion in their file.
Program Examinations

Doctoral students complete two major program examinations. The Second-Year Competency Exam is a five-hour examination completed over two days covering major foundational domains of school psychology. The Candidacy exam is comprised of three short papers related to the student’s area of research interest. More information on these exams was presented earlier in this Handbook.

Portfolio Assessment

Throughout their work at NIU, students develop a portfolio of knowledge- and performance- based products related to their graduate training in school psychology. The final result of the portfolio assessment is a collection of “best-work” products that serve to document students’ completion of program competencies for faculty evaluators and others, such as future employers. Additional information on the portfolio can be found in the previous section on the Portfolio and in Appendix B: Portfolio Assessment Procedures.

Alumni Surveys

APA accreditation requires the program to collect and report data on our alumni for 10 years after graduating. Students understand that after completing the program, they will be contacted periodically (each year, sometimes with two separate surveys) by the School Psychology Program in order to gather certain information for annual and accreditation data reporting. These data are important for us to be able to continue to provide students with a high-quality doctoral education.

Procedures for Students Making Insufficient Progress

Students’ progress in their professional development as school psychologists is monitored closely by faculty throughout the program. This includes formal assessment procedures such as course grades, exams, research projects, and annual evaluations. It also includes less formal observation of students’ performance during such activities as assistantships, presentations, and interactions with both NIU and other professional colleagues. Should serious concern arise about a student’s professional development of competencies or appropriate professional or ethical behavior, these concerns will be identified and communicated to the student as part of their annual evaluation. If program faculty believe that more systematic feedback, remediation, and monitoring is necessary, the following procedures will be followed:

1. The Director and one other relevant program faculty member (e.g., practicum supervisor) will meet with the at-risk student to understand the nature of the student’s difficulties, explore options, specify identified weaknesses, and develop goals and strategies for remediation.

2. An individualized plan will be developed that will specify student activities, expected levels of performance, methods of faculty monitoring, and schedule of evaluation.

3. The student will be provided written feedback about his or her performance on a scheduled basis.

4. At the conclusion of the remediation period, the school psychology faculty will determine whether sufficient progress has been made for the student to be no longer considered “at risk,” to continue or modify the remediation plan, or to terminate the student from the program. The faculty’s decision will be communicated to the student in writing.
5. The student may appeal the faculty’s decision to the department chair, who will review the recommendations with the student, coordinator, and other relevant parties. If the decision is unchanged, the chair will inform the student of the process for further appeal.

6. If a student is dismissed from the program, a final meeting should be initiated by the Director to provide help or referrals for: academic counseling, personal counseling, status of future letters of recommendation, and any other issues of concern to the student.

Maintaining Student Records

The School Psychology Program maintains (a) digital records for program level documentation and evaluation (e.g. practica evaluations, annual evaluation letters, internship application and completion records, any remediation plans) and (b) individual, hard copy folders for each student for departmental paperwork showing completion of major milestones such as thesis proposal, candidacy exam, signature forms indicating passing of dissertation defense, etc. The Department and Graduate School do not retain hard copies of the thesis or dissertation documents, instead storing them through ProQuest Digital Dissertations. The School Psychology Program hard copy files are kept inside the Graduate Studies Assistant’s office in a locked file cabinet, accessible only to her or authorized Departmental Administrators and staff and the Program Director. The digital files are kept on a secure OneDrive server accessible only by the Program Director, Program Assistant, and Graduate Studies Assistant.
Student Rights, Grievance and Other Procedures and Student Support

Several procedures and guidelines are in place to ensure that students feel respected, understand their rights, and know how to proceed with any complaints or grievances, and students have a right to having any grievances handled effectively and fairly.

First, there are informal procedures that students are encouraged to utilize to handle program complaints or grievances. Students are encouraged to bring the complaint to the attention of the program via the Program Director, their assigned faculty advisor, or through the School Psychology Student Organization (SPSO). All student concerns and grievances will be treated fairly and kept confidential. The nature of all grievances will be documented for program development and evaluation. Students may also opt to more formally bring complaints to the Department or University. Within the Psychology Department, students may contact the Director of Graduate Studies or the Graduate Student Advisory Committee regarding concerns. See the Department of Psychology Graduate Student Manual for information on the formal Departmental grievance procedures. This Handbook also provides information on appealing course grades. Students are encouraged to see Procedures for Students Making Insufficient Progress in this Handbook.

Regarding any perceived harassment or discrimination, students should please see the Nondiscrimination, Harassment, and Retaliation Policy and Complaint Procedures put forth by the NIU Ethics and Compliance Office. https://www.niu.edu/policies/pdf/nondiscrimination-harassment-retaliation-policy.pdf

Students are encouraged to familiarize themselves with the document Northern Illinois University: Student Code of Conduct.

In addition, grievance procedures for students are detailed in the Constitution and Bylaws of Northern Illinois University (Article 6, Grievance Procedures for Students).

Finally, two of the most relevant University resources for students regarding grievances are listed below:

The NIU Ombudsperson, 815-753-1414, Ombuds@niu.edu . The University ombudsperson is independent of the university's formal administrative structure and will consider all sides of an issue in an impartial and objective manner. The ombudsperson cannot impose solutions, but will identify options and strategies for resolution.

The Office of Affirmative Action and Equity Compliance, Human Resource Services, 815-753-1118. Any student who experiences and/or witnesses possible acts of discrimination, harassment, or retaliation has the right to report this activity the Office of Affirmative Action and Equity Compliance. All complaints and/or allegations of discrimination will be examined in a reasonable, objective, confidential, and expedient manner, and in accordance with applicable federal and state employment laws. This office also offers alternatives to filing a complaint: Mediation and Confidential Counseling.

About Northern Illinois University and the College of Liberal Arts and Sciences

Chartered in 1895, Northern Illinois University is one of the nation’s premier regional public universities, a comprehensive teaching and research institution with over 19,000 students. The mission of the University is to promote excellence and engagement in teaching and learning,
research and scholarship, creativity and artistry, and outreach and service. NIU is included in the Research Universities-Higher Activity category of the Carnegie Foundation for the Advancement of Teaching. The University has 23 doctoral programs, with 15 Ph.D.-granting departments, including the Department of Psychology. NIU is accredited by the Higher Learning Commission and is a member of the North Central Association.

The College of Liberal Arts and Sciences is the largest of NIU’s seven colleges, with 33 baccalaureate degree programs, 31 graduate programs, 18 departments, 11 doctoral level programs, 7 research centers, and 5 interdisciplinary research and teaching programs. The College is committed to promoting excellence in undergraduate liberal education and in graduate programs built around cutting-edge research, and to fostering the connections between teaching and research, to their mutual benefit.

About the Psychology Department

Housed within the College of Liberal Arts and Sciences, the Psychology Department is a vibrant and exciting atmosphere in which to develop and train as a psychologist. The Department provides advanced training in several areas of psychology including:

- Clinical psychology (APA-accredited)
- Cognitive-Instructional psychology
- Developmental psychology
- Social & Industrial/organizational psychology
- Neuroscience and Behavior
- School psychology (APA-accredited)

Students obtain training that integrates both basic and applied aspects of psychology. Each area of study is designed to thoroughly acquaint students with the theoretical content of the particular area and to provide training in the research skills needed to become competent and creative investigators. In addition to being prepared to succeed in academic settings, our students also find suitable placements as applied researchers or service practitioners in a variety of mental health, educational, physical health, and organizational (e.g., corporate and non-profit) settings. Financial support, in the form of research or teaching assistantships, is generally available to graduate students in the Psychology Department who are making satisfactory progress in the program. Study in Psychology at NIU is of the highest quality as we have over 30 full-time, Ph.D. faculty in the department. Each academic year approximately 135 students are enrolled in the graduate psychology program, including several on clinical or school internship, and several in the process of completing their dissertations while employed off-campus. At any point, there are approximately 85-90 students in full-time residence.

The Department is located in a large building which provides ample research, clinical, and office space for faculty and student use. The Department also administers the Psychological Services Center, a clinic facility designed to provide both training to departmental students and service to the community. The Psychological Services Center is equipped with extensive videotaping capabilities, observation facilities, and rooms designed for testing, as well as individual and group counseling.
Department and University Assistantship Support

Graduate students in the department typically receive financial support from a number of sources within the university community to assist with some costs associated with the program. Listed below are the three most common of these sources of support for school psychology students:

1. **Graduate Assistantships**: The Department of Psychology awards a large number of full- and part-time graduate teaching and research assistantships each year. Teaching assistantship duties include classroom teaching under appropriate levels of faculty supervision and assisting with undergraduate laboratory sections and graduate courses in assessment and statistics. Teaching assistants are also assigned to support the research of faculty members, primarily through overseeing undergraduates in PSYC 485 (Independent Study), where undergraduates gain research experience working on faculty research. Research assistantships are also occasionally available on faculty research grants and contracts. Externships (placements in school districts or other community settings) are available typically after the third year in the program.

   **Stipends**: Most students receive a full-time assistantship with expectations of working 20 hours per week. Depending on the availability of funds, assistantships may be awarded on a half-time basis, with a corresponding reduction in hours and stipend amounts. Assistantships are typically for a nine-month period. All assistantships include tuition remission for the academic year plus the following summer session. Students are responsible for the payment of fees and necessary insurance. Historically, the school program has supported all first-year students with the vast majority of our students in good standing continuing to receive full funding until they depart for internship.

   **Summer Support**: Limited financial support is available during the summer months.

2. **Fellowships**: The Graduate School offers a limited number of fellowships awarded on a university-wide competitive basis to graduate students whose performance has been outstanding. These awards include University Fellowships for students working on the M.A. degree and Dissertation Completion Fellowships.

3. **Additional sources of support for minority students**: The Graduate School provides funds on a matching basis with the department for a number of Rhoten Smith Assistantships for minority students. These assistantships carry stipend levels and duties consistent with other assistantships in the department. Because of the cost-sharing with the Graduate School, students receiving the Rhoten Smith Assistantship have priority funding during the summer months. Other programs are available to support minority students. The Diversifying Higher Educational Faculty in Illinois (DFI) is a state-supported program that provides one year of support that can be renewed for up to three years. The Carter G. Woodson Scholars Program (CGWSP) is funded locally by NIU and is reserved for doctoral level students with expressed interest in academic careers. The maximum length of tenure for the CGWSP is two years. All of these fellowships are competitive and open to minority students in all graduate departments. In addition to access to these special funds, minority students are eligible for the usual financial assistance available in the department. More information can be found at [www.niu.edu/grad/funding/fellowships.shtml](http://www.niu.edu/grad/funding/fellowships.shtml).
Costs Associated with Program

Just as with any graduate program, there are costs associated with the program that cannot be covered by the options mentioned above. Below is a table showing an estimate of out-of-pocket costs to expect. For your information, a Tuition and Fee Estimator is available at: [http://www.niu.edu/bursar/tuition/estimator.shtml](http://www.niu.edu/bursar/tuition/estimator.shtml).

The program faculty as well as the School Psychology Student Organization (SPSO) work hard to find ways to support students in their conference and research endeavors. There are times when the Department, the College, and/or SPSO are able to provide small travel grants to students presenting at conferences, for example. The above information is simply provided so that students can plan for opportunities that may not be fully or partially funded.
Michelle Demaray, Ph.D., LCP  
**Professor, School Psychology Program**  
Dr. Demaray (Ph.D., University of Wisconsin-Madison) is a NIU Presidential Research Professor. She has authored and co-authored numerous peer-reviewed journal articles and has presented her research at many professional conferences throughout her career. Her research interests focus on bullying and victimization in schools, including cyber-bullying, cyber-victimization, and the role of bystanders in the bullying situation. Dr. Demaray has also spent over two decades focused on the measurement of social support and the relations among perceived social support in youth and positive and negative outcomes. She is also interested in both research and clinical practice issues relevant to Attention-Deficit/Hyperactivity Disorder (ADHD). More broadly, she is interested in social-emotional issues in schools. She has taught a variety of courses at Northern Illinois University including Psychological Assessment of Children, Principles of Behavior Management, and Developmental Child Psychology. Dr. Demaray was the 10th editor-in-chief for the Journal of School Psychology, a leading journal in our field that is managed by the Society for the Study of School Psychology.

Christine K. Malecki, Ph.D., LCP  
**Professor, School Psychology Program**  
**Director, School Psychology Program**  
Dr. Malecki (Ph.D., University of Wisconsin-Madison) joined the Psychology faculty in Fall 1999. She served as a practicing school psychologist in Carroll, Iowa for Heartland Area Education Agency 11 for two years before coming to NIU. She is clinically licensed and is the Director of Clinical Training for the School Psychology Program. Dr. Malecki is an NIU Presidential Engagement Professor. She has served nationally as the Chair of the Council of Directors of School Psychology Programs (CDSPP, 2014-15) and the Secretary of the Council of Chairs of Training Councils (2014-15). Dr. Malecki currently teaches first year students each semester (intro class and academic assessment and intervention). She has authored and co-authored many peer-reviewed journal publications and has presented her research at a number of professional conferences throughout her career. Dr. Malecki’s research interests include the study of students' perceived social support and how that support is related to their adjustment and academic achievement, the complexities of bullying behavior, and curriculum-based measurement (CBM) in written language. She is also interested in the relationship between social context and academic achievement and innovative school psychology delivery services.

Julia Ogg, Ph.D., LCP  
**Professor, School Psychology Program**  
Dr. Ogg (Ph.D., Michigan State University) joined the program in 2015. Dr. Ogg teaches a series of mental health focused courses in the program (e.g., Tier 1 and 2 mental and behavioral interventions, psychotherapeutic interventions, parent training). Dr. Ogg’s research focuses on youth with externalizing behavior challenges, and home and school factors that supportive adaptive development. Dr. Ogg is particularly interested in studying this relationship in children starting kindergarten, as well as how family-school relationships change as children progress through school. Dr. Ogg is also studying parenting attitudes and behaviors that support the development of academic enabling classroom behaviors (e.g., engagement, prosocial skills) in children. Dr. Ogg is licensed as a clinical psychologist and provides clinical services to children and families one evening a week. She serves as the Secretary for Division 16 (School Psychology)
of the American Psychological Association, and will begin her role as the Vice President of Publications and Communications for the APA Division 16 starting in January 2022.

**Kara Styck, Ph.D., LCP**  
*Associate Professor, School Psychology Program*  
Dr. Styck (Ph.D., Arizona State University) studies psychological measurement. In particular, she is interested in developing tools that improve how we measure psychological attributes (i.e., cognitive ability, social skills, and academic engagement and motivation) for students in K-12 and higher-education classrooms. Dr. Styck is also interested how psychological measurement impacts educational decisions for students (e.g., screening, progress monitoring, probable diagnoses, etc…). Graduate courses recently taught by Dr. Styck include Theory and Assessment of Intellectual Functioning and Consultative Interventions in School and Community Settings.

---

**Molly McDade, Ph.D., LCP**  
*Regular Adjunct Professor, School Psychology Program*  
Dr. McDade (Ph.D. Northern Illinois University) teaches the five Practicum Courses, including First-Year Practicum (spring) and full years of Second-Year Practicum and Advanced Practicum. Dr. McDade is clinically licensed and supervises the Advanced Practicum students in the Psychological Services center. She is also a practicing school psychologist in a nearby school district.

School Psychology Advisory Board
The NIU School Psychology Advisory Board was formed in 2005 to provide the program with more formal, ongoing contact with the school psychology community. The advisory board meets at least once every other year to provide feedback about all aspects of the program. Most recently, the board reviewed the program structure and objectives, recruiting diverse students, and program strengths and weaknesses.

Appendix A: Competency Exam Reading List

**Legal and Ethical Practice**

**Cultural and Linguistic Diversity-Informed Assessment**

Appendix B: Portfolio Assessment Procedures

A. Portfolio Assessment Purpose
Students are to develop a portfolio of performance-based products from their internship year related to their graduate training in school psychology. The portfolio assessment is intended to enable students to celebrate the culmination of their progress through the school psychology program and ensure that primary program objectives were met as reflected in these internship products. The final result of the portfolio assessment will be a collection of “best-work” products that serve to document students’ completion of program objectives for faculty evaluators and others, such as future employers.

B. Portfolio Content
The specific contents of the portfolio will be unique to each student but should provide evidence of having met the NIU school psychology program competencies. High quality portfolios will provide relevant and high-quality products from the internship year for each program competency. The portfolio will also include evidence of students’ applied experiences with diverse populations. Students are also required to submit two formal case studies, one academic and one behavioral, to demonstrate a positive impact on student learning. Finally, the portfolio will also require students’ self-reflection on the evidence they provide in the portfolio for each program objective. Specific requirements on portfolio contents are provided in this document.

C. Suggested Portfolio Organization
Please organize the materials by piece of evidence, regardless of the association to the competencies. For example, a student might have a case study report that provides evidence for three or four competencies. They would only include that report once but would refer to it in the evidence table for each relevant competency for which it is being used. The Evidence List Table would note the location of each piece of evidence. The portfolio supporting documents should all be at the beginning of the portfolio. These items are listed below as part of the list of requirements.

Please number, label, or otherwise clearly identify each piece of evidence in your portfolio. In your evidence tables or other references to your evidence, please use these numbers or labels in addition to noting in which binder or location the evidence can be found. Page numbers can be used to serve this purpose but are not necessary if the evidence can be easily found in some other way.

Please de-identify, to the fullest extent, all case study reports or other pieces of evidence referring to children or adolescents.

D. Portfolio Format and Requirements
Each of the following documents should be included in your portfolio and should be easily accessible. Please title each document as noted and present the documents in the following order.

1. Overview Document
One or two paragraphs should be written as an introduction to the portfolio and as an overview of how it is organized.

2. Table of Evidence (One Piece of Evidence listed for Each Program Competency)
One “best practices” internship-based performance product should be listed for each Program Competency in this table (one table total, example later in this packet).

3. Impact on Student/Client Learning Evidence (2 reports and 2 case study rubrics)
Two cases studies will make up your two pieces of evidence from your internship highlighted as evidence that your work resulted in improved outcomes for a student/client. Please have one separate page titled “Impact on Student (or client) Learning Evidence,” list the location of the
two reports, and describe the evidence and how it demonstrated student/client learning. This evidence should include two case studies, one academic and one behavioral. You should self-evaluate your reports using two of the Case Study Evaluation Rubrics. You need not have every element.

4. Reflective Statements (one per OBJECTIVE for 7 total)
A self-reflective statement must be written for each Program Objective. These statements typically will be one to two pages single spaced and must address two issues: (a) How have your courses, practica, professional development, and internship combined resulted in the completion of the relevant objective? (b) What are your self-reflection / self-evaluative thoughts regarding the objective as it relates to your professional strengths / weaknesses, goals, and plans for future development? Please refer to your entire graduate school journey including courses, supervision, practica, professional development, and internship in these statements. However, please also tie in the portfolio evidence that you are using to illustrate having met this objective (sometimes involving more than one competency).

5. Experiences with Diverse Students Table
This table should include a list of all practicum, assistantship, internship, and other settings in which you have had professional experiences during your time at NIU. For each setting, you will indicate if you have had experiences with individuals in the diverse populations (low income, limited English, disability, ethnic groups).

6. Self-Assessment Table (with Strengths/Weaknesses clearly highlighted)
This table should include a list of all competencies and should contain your self-ratings of the evidence in your portfolio. You will also highlight the competencies you believe are your strengths and areas in need of growth. The format of this table is provided in this document in Table 3.

7. EVIDENCE: The portfolio will provide one piece of internship evidence for each of the following Doctoral Program competencies

E. Sample Portfolio Contents
Provided below is a list of the NIU student competencies and a sample of possible portfolio items that could work to document your competency. Students are encouraged, however, to include any products that you believe illustrate your competency. This list is not exhaustive!

I. Case Study Evaluation Rubric (2 required)

Two of the required items to be submitted as part of the portfolio include an academic and a behavioral case study from the internship year. These case study reports should follow best practice in assessment, intervention, evaluation and consultation as much as possible and be consistent with NASP criteria. The case studies should follow the problem-solving process and the steps of this process should be documented throughout the report. The rubric below is used to evaluate the case studies using an adopted version of the criteria from the NCSP Case Study Evaluation Rubric. Students are evaluated on their total percentage of points earned compared to the number of total possible points (31 points). In addition, students are evaluated on whether or not they have evidence of positive impact on the student(s) with whom they worked. They are also to provide data to support that impact.

<td>Goal line comparison</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Trend line comparison</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Effect size</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Does student meet the “Effective” criterion using at least one of the above methods?  
Yes  No

Data (PND, effect size, etc.):  

1. **Percentage of non-overlapping data points:** The most extreme baseline point (highest if the desired effect is an increase and lowest if the desired effect is a decrease) is determined and a line is drawn from that data point across the intervention data graph. The number of data points above or below (depending on the desired outcome) are counted and divided by the total number of data points to determine a percentage. Scruggs and Mastropieri (1998) recommend a percentage above 80 to be considered a large effect.

2. **Goal Attainment Scaling** (Roach & Elliott, 2005): Provide individualized approach to determine the effectiveness of an intervention using specific criterion. Involves selecting a target behavior (objective behavior), describing the desired outcome behavior, plan instruction/intervention, construct the goal attainment scale, implement the instruction or intervention and evaluate instruction or intervention using the GAS ratings. Goal Attainment Scale: create a 5 point scale ranging from +2 (best possible outcome) to -2 (worst possible outcome). A score of 0 represents no change in behavior. Determine the appropriate dimensions depending on the behavior (Frequency, quality, percentage, etc).

3. **No Assumptions Effect Size** (Busk & Serlin, 1992): subtracting the mean of the baseline from the mean of the intervention data and dividing by the standard deviation of the baseline. Burns and Wagner (2008) found a mean NAES of 2.87 for interventions that were considered effective. Since NAES often exceed 2, the cohen’s typically used es is not generally applicable to this effect size.

4. **R²:** Most widely accepted effect size. Can be easily computed using excel by creating a line graph, right click on the line and select “add trend line”. Next select the “display R-Square value on chart” option and close. Cohen (1988) recommends that .25 is considered large effect, .09 is moderate and .01 is small.
5. **Goal line comparison (Fuchs & Fuchs, 2011):** If the student’s most recent four consecutive scores are above the goal line, the student’s goal should be increased.

6. **Trend line comparison (Fuchs & Fuchs, 2011):** If the student’s trend line is steeper than the goal line, the goal should be increased.

7. **Student attained specified goal:** A decision rule or goal should be established prior to the implementation of the intervention to set a criterion to determine whether or not the intervention should be considered successful or whether the student is making progress at an acceptable rate. If the student reaches this goal at the end of the intervention period, the intervention can be considered successful.

M. Portfolio Evaluation

Evaluation of the student portfolio will be conducted by program faculty near the completion of the internship experience. Portfolios will be evaluated for the quality of products presented, the quality of the reflective statements, and self-evaluation of the academic and behavioral case study reports including the impact on student learning criterion.

Portfolio Evaluation Rubric:

1. Suitability/quality of evidence for each objective
   a. Excellent: Relevance of portfolio product is evident; clear link made between evidence and competency and product is high quality.
   b. Satisfactory: Relevant and adequate product available for each competency.
   c. Unsatisfactory: Product is clearly not related to the program competency or is of low quality and not reflective of skills that would demonstrate competency.

2. Quality of reflective statements
   a. Faculty will evaluate (overall) the quality of the reflective statements. Criteria or excellence will include demonstration of meaningful reflection on your competency in each objective area and will include the quality of your writing.

   a. Case study rubrics will be complete. Students will show effective self-reflection in critically evaluating their own reports. Scores are not required for each element, but students are encouraged to have as many elements as possible in their reports. Similarly, positive impact is not required, but the report should address factors that can be addressed to change the trajectory if impact is not positive.

Appendix D: Student Support Services Available at NIU

Northern Illinois provides an exceptionally supportive environment for faculty and graduate students alike. Student support services are a priority for the university, and they are not only comprehensive in scope, but they are user friendly and competently run. The following is a selection of those services that are particularly relevant to school psychology graduate students:

- **Child Development and Family Center** – a licensed facility, as well as accredited through the National Academy of Early Childhood Programs. The center provides full-time and part-time childcare for children ages 2 months to 5 years. Parents must be a student or faculty/staff at Northern Illinois University to enroll their child in the center. Priority for enrollment is given to students. Students make up 70% of the Center’s enrollment while faculty and staff make up 30%.

- **Counseling and Consultation Services** – a comprehensive human development service providing a full range of programs to meet the needs of a diverse student population. The mission of the Counseling and Student Development Center is to support the intellectual, emotional, social, and cultural development of students by offering a wide range of counseling, consultation, and educational services, including psychological counseling, group therapy, and crisis intervention. Drug and alcohol assessment and treatment are offered, as well as services related to interpersonal violence.

- **Disability Resource Center (DRC)** – ensures that NIU’s academic and campus facilities are available to all students, faculty, and staff. The DRC advocates accessible opportunities by providing a wide range of support services tailored to individual needs and cooperates with a network of other NIU offices and outside agencies to enhance related services and assist individuals with disabilities.

- **Gender and Sexuality Resource Center** – helps to provide a university climate that supports the academic and professional success of these members of our university community. With the goal of fostering a welcoming campus environment, the university offers a variety of programs, services, and activities to serve the needs of individuals who are lesbian, gay, bisexual, or transgender as well as for the benefit and enrichment of the entire campus.

- **Northern Illinois University Health Service** – provides high quality primary health care and prevention services at reasonable cost to eligible students.

- **Office of the Ombudsperson** – provides confidential and informal assistance for resolving university related concerns. The ombudsman is independent of the university's formal administrative structure and considers all sides of an issue in an impartial and objective manner. The ombudsman cannot impose solutions but will identify options and strategies for resolution. The ombudsman advises students of their rights and responsibilities within the university but cannot provide legal advice.

- **Student Legal Assistance** – an office that provides legal advice and assistance to students.

- **University Libraries** – NIU has several libraries including the Shapiro Law library. The main library includes an extensive collection containing 1,654,926 volumes and a large collection of journals and periodicals. It also participates in an interlibrary loan service. The library periodically consults with the Department of Psychology regarding books and periodicals pertinent to the educational objectives of the department. The NIU institutional web page contains information for students on all of the above resources.
Appendix E: Internship Agreement

Northern Illinois University

INTERNSHIP AGREEMENT
FOR THE ____-____ ACADEMIC YEAR

___________________________________________________________
___________________________________________________________
________________________________________________________________________
________________________________________________________________________

Name of School System/Agency
has agreed to accept

___________________________________________________________
Name of Intern

as an intern for the ____,____ academic year. The internship site and the intern agree to observe
the following arrangements in meeting the requirements of the internship.

1. DURATION: The internship will begin on ___________ and continue through
____________. The intern is expected to follow the same daily schedule and yearly
calendar as other psychology staff employed by the school system/agency. The intern is
not required to remain in the employment of the local school system/agency beyond the
term of the internship. Furthermore, the intern is not guaranteed employment beyond the
term of the internship.

2. HOURS: The intern is appointed on a full-time basis for one year. The doctoral level
intern must complete at least 2000 hours of supervised experience and the Specialist SSP
intern must complete at least 1200 supervised hours.

3. LOCATION: The internship will be performed at the following location (s):

Name Internship Site:

Address:

4. PLAN: Internship activities shall be determined by a written plan developed jointly by
the intern and internship personnel and approved by the University internship supervisor.
It is expected the plan will be consistent with the guidelines and objectives as contained
in the Illinois School Psychology Internship Manual and with the internship training
standards of the National Association of School Psychologists (NASP) internship criteria.
If a doctoral internship, CDSPP guidelines must be met (see additional contract).
5. **COMPENSATION:** The intern is provided a salary commensurate with his or her level of training, experience and period of appointment. The intern will be paid in the amount of $________ for the term of the internship. Any work related travel necessary to fulfill the requirements of the internship shall be reimbursed in accordance with the policies of the local school system/agency.

6. **CONFERENCES, SEMINARS, AND IN-SERVICE TRAINING:** Ongoing conferences, seminars, and in-service training opportunities available to employed psychologists should also be available to interns. The intern is encouraged to participate in state, regional, and national level meetings for school psychologists. Released time for attendance at professional meetings is required.

The intern will be expected to attend the following conferences, seminars, and/or in-service training program(s):

- Intern/intern supervision workshop (typically in Sept. at ISU)
- Illinois School Psychologists Association (ISPA) Annual Conference
- University Internship Meetings at NIU (2 per year)

7. **WORK ENVIRONMENT:** Consistent with the availability of resources to employed staff, the intern is provided adequate supplies and materials to carry out the functions of the internship. An appropriate work environment should include adequate privacy of office facilities and access to secretarial assistance, telephone services, office equipment, and copying machines.

8. **SUPERVISION:** The cooperating practitioner must hold a valid credential as a school psychologist (and if a PhD internship, must be a professionally licensed psychologist). Full-time employment at the internship setting for at least one year prior to assuming supervisory responsibilities for an intern is required. Concurrent full-time employment as a school psychologist is required.

Cooperating practitioners shall provide at least two hours per week of direct supervision for each intern and be responsible for no more than two interns at a time. The intern will receive at least two hours of supervision per week directly from:

Name of Cooperating Practitioner

The university supervisor (or designate) shall maintain an ongoing relationship with the cooperating practitioner and the intern. The university supervisor (or designate) will make at least one site visit per semester for each intern (or phone conference if out of state or long distance).

9. **TRAINING COMMITMENT:** The local school system/agency is primarily committed to the internship as a training experience. Employing interns as a means of acquiring less
expensive services is unacceptable. Interns are expected to participate in tasks appropriate to the completion of the internship training plan. The intern will not be asked to serve in any capacity other than that for which she or he was appointed.

APPROVAL:

_________________________________________  Date
University Supervisor (or Designee)
**Note that APA accredited internships will have their own agreement that will be utilized with NIU. If the internship is not APA accredited, the following contract should be signed (instituted Spring, 2021).**

NIU Agreement with Internships not yet APA Accredited

CDSPP Doctoral Internship Guidelines

Based on CDSPP guidelines approved by the membership, June, 2017

In the absence of special circumstances, a doctoral internship program in school psychology that meets these guidelines will also be considered as meeting current *Guidelines for Defining an Internship or Organized Health Service Training Program in Psychology* as developed by the National Register of Health Service Providers in Psychology to identify an acceptable internship, which is one of several requirements for credentialing by The National Register of Health Service Providers in Psychology.

1. A school psychology doctoral internship is an organized training program designed to provide an intern with a planned sequence of training experiences that will develop the intern’s profession wide competencies in health service psychology and the specialty of school psychology.

The internship is the culminating (i.e., completed after a programmed sequence of coursework, practica, and field experiences), supervised training experience prior to the granting of a degree by a doctoral program. Consistent with the definition of health service psychology (i.e., the integration of psychological science and practice in order to facilitate human development and functioning), the internship consists of a range of activities promoting the development of the following profession-wide competencies¹:

- research;
- ethical and legal standards;
- individual and cultural diversity;
- professional values, attitudes, and behaviors;
- communication and interpersonal skills;
- assessment;
- intervention;
- supervision;
- consultation and interprofessional/interdisciplinary skills.

2. The intern, whether full-time or part-time, spends at least 25% of his or her time in providing direct (face-to-face) psychological services to clients, patients or consultees, such as teachers or other mental health service providers, which translates to a minimum of 375 hours out of 1500 doctoral internship hours². The intern engages in research

---

¹ This listing identifies the profession-wide competencies required for all students who graduate from APA accredited programs in health service psychology. (SoA, 2015).

² These specific guidelines are consistent with requirements established by the National Register.

https://www.nationalregister.org/apply/credentialing-requirements/
activity which includes the evaluation of services delivered and the effectiveness of the intern’s own training.

3. The internship program must provide prospective interns with a dated written statement, brochure, or website that clearly states the aims, activities, and any requirements of the doctoral internship program, the supervision and supplemental training activities (e.g., learning experiences) provided, and clear expectations for the quality of interns’ work. The internship program, doctoral program, and intern must jointly approve in writing the goals and content of the internship, including clearly stated expectations for the nature of experiences offered by the internship program, the quantity and quality of the work, intern salary, benefits, reimbursable travel, holidays, and other relevant internship policies.

Internship program due process procedures are made available to interns prior to the beginning of the training period. If due process procedures are initiated as a result of intern behaviors, intern activities, or internship conditions, the supervisor of the internship program will notify the intern’s doctoral program.

4. Interns will minimally receive a formal, written evaluation at the end of the doctoral program’s semester, trimester, or quarter course grading period. The internship program and doctoral program will agree in advance upon the format of the internship evaluation, which should in part be based on direct observation. The evaluated areas will be consistent with the doctoral program’s aims and address intern development of profession-wide competencies.

Although the internship supervisor evaluates student performance during the internship year, the doctoral program is ultimately responsible for the determination of the student’s readiness for graduation and entrance into the profession. Therefore, communication between doctoral programs and internship programs is of critical importance to the overall development of competent health service psychologists.

5. Full-time internships are completed in no less than 10 months; part-time internships may extend to no more than 24 months. The internship includes a minimum of 1,500 hours (NIU requires 2000) in activities described above. Interns should consult relevant credentialing (e.g., state licensure and certification) requirements to determine the number of internship hours required for licensure and other desired credentials. Note that the National Association of School Psychologists (NASP) has established requirements for internship (e.g., completion of at least 600 hours in a school setting), but this is not required for NIU. (The 600 school hours can be in advanced practicum).

6. The doctoral internship program issues to the intern written documentation (e.g., a certificate or letter) reflecting successful completion of a doctoral level internship in health service psychology.

7. The internship program employs a clearly designated doctoral-level psychologist, who is currently licensed by the state regulatory board of psychology to practice at the independent level and is responsible for the integrity and quality of the internship program.
The internship program has at least two psychologists on staff available as supervisors for the intern. The intern’s primary supervisor must be actively licensed as a psychologist by the state regulatory board of psychology. Internship programs such as school districts that have the capacity for only one staff psychologist may meet the spirit of this criterion (breadth of training experience) by entering into formal internship agreements with other entities, such as other school districts, clinics, or university doctoral programs.

8. The full-time internship includes at least two hours per week of regularly scheduled individual supervision by a doctoral level psychologist licensed for practice at the independent level. The primary supervisor must directly observe the intern with the specific intent of evaluating the intern’s clinical deportment and skills in psychological service delivery, and providing formative and summative feedback to the intern and university program. An internship program that does not permit live observation or audio-video recording by policy should not be approved under these guidelines.

9. In addition to the individual supervision (as described in #8 above), the intern spends at least two additional hours per week in scheduled group or individual supervision conducted by an appropriately credentialed health service provider (e.g., doctoral level psychologist, credentialed school psychologist, etc.).

The intern has regularly scheduled, supervised, and documented training activities with other doctoral psychology interns such as professional development/in-service training; case conferences involving a case in which an intern is actively involved; seminars dealing with professional issues; or observing delivery of health, educational, and/or child/adolescent services. These activities may be in conjunction with appropriately credentialed professionals other than school psychologists.

10. The internship program has two or more interns engaged in training at the same time. However, agencies having the capacity for only one intern may meet the spirit of this criterion (i.e., the socialization of doctoral-level psychology interns) by having regularly scheduled and documented training activities with psychology interns at other sites in the immediate geographic area or, when internship sites are at a significant distance from each other, by making arrangements for regularly scheduled meetings of interns for several hours on at least a monthly basis.

11. Internship supervision may be provided through synchronous audio and video format where the supervisor is not in the same physical facility as the intern. Supervision through electronic means may not account for more than one hour (50%) of the minimum required two weekly hours of individual supervision (as described in # 8 above), and two hours (50%) of the minimum required four total weekly hours of supervision (as described in #8 and #9 above). The use of telesupervision should be consistent with the program’s overall model and philosophy of training, with assurance that relationships between supervisors and trainees are established prior to engaging in telesupervision. Programs utilizing any form of telesupervision have a formal policy that includes procedures to address issues of non-scheduled consultation, crisis coverage, and handling of privacy and confidentiality. These policies and procedures are established in advance and shared among the training program, the internship site, and the intern(s). Internships
using telesupervision adhere to best practices and ethical, legal, and professional guidelines.

12. Reports and documents prepared by the doctoral intern for consumers, other agency or school personnel, or other relevant publics are co-signed by the licensed psychologist supervisor for the intern.

13. The intern has a title such as “intern,” “resident,” or other designation of trainee status regardless of pay grade or temporary licensure status, etc. Interns who hold other relevant credentials (e.g., National Certified School Psychologist, NCSP) may include this information as long as it is accompanied by recognition of his or her doctoral intern status.
