

At NIU, degree programs with specialized accreditation *may* establish agreements with Accreditation, Assessment and Evaluation (AAE) to use their accreditation-related assessment reporting process in lieu of the general university reporting process. Agreements can be established for programs that have a process for regularly collecting and using assessment data and for obtaining outside feedback on the assessment process and its implementation. Such programs are not required to submit full assessment plans to AAE but do provide a list of student learning outcomes (SLOs) and assessment methods. This program has established such an agreement.

Please contact AAE at [assess@niu.edu](mailto:assess@niu.edu) if you have further questions.
