
Below is a list of more than 1,600 journal articles, chapters, books, dissertations, theses, convention papers, unpublished reports, and other documents describing the uses/limitations and/or psychometric characteristics of the Child Abuse Potential (CAP) Inventory and modified versions of the CAP Inventory. This reading list is meant to be exhaustive. Further, it is important to mention that there was no screening of the listed materials with respect to the quality or accuracy of their findings or conclusions.

Note. Please send information on any errors (major or minor) or article omissions in this reference list to Joel S. Milner at jmilner@niu.edu. Thank you.
