Overview: As a Secondary Science Educator Licensure candidate, you have been invited to observe in a school setting for the semester leading up to your placement as a student teacher. Assuming that the observation experience and your academic semester go well, you will then be student teaching. Your goal during this semester’s observation is to lay the groundwork for a successful student teaching experience by learning as much as you can about your host school’s science department and curriculum. Furthermore, you will establish a professional working relationship within the department, and observe various teaching methodologies at work in light of what you have learned and will continue to learn from your coursework here at NIU. You will also teach at least two lessons with the permission of your cooperating teacher and complete a “Practice” edTPA. As the final clinical preceding student teaching, the 401 clinical calls on students to move beyond theory to practice.

You are not new to clinical observation and its unique nature. Always remember that you are a guest in the school, that the teachers and administration have agreed to assist you in your professional development, and that you must lay the groundwork for a successful experience. During your initial visit please share this information with school officials so they know what you are required to do throughout the semester. If they have any questions that you are unable to answer, please have them contact me directly.

This course meets in conjunction with the second methods course (BIOS 403, CHEM 495, GEOL 495, ENVS 495, and PHYS 495). As a result many of the issues and ideas that come out of your observations will coincide with discussions in the second methods course. However, while the topics and the nature of the discussions are related, there are distinct and separate meetings and requirements for the 401 clinical in order to justify separate credit and to satisfy ISBE standards and requirements for all secondary science educator licensure programs and its program completers. This class will meet for eight selected meetings. Although the dates have been set, some adjustments may need to be made once all placements have been secured and the process of observations are underway. As well, you should expect at least one on-site visit by me or your methods 2 instructor to your placement for a joint meeting with your cooperating teacher.
Course Goals and Objectives:

As the third of three NIU courses designed to meet the Illinois State Board of Education’s required 100 clock hours of pre-student teaching experiences, the 401 clinical calls on secondary science educator licensure candidates in the Departments of Biological Sciences, Chemistry and Biochemistry, Geology, Environmental Science, and Physics to develop new professional skills as well as to continue growing in terms of previous learning.

Candidates in this clinical will:

1. Continue to demonstrate their understanding of, and begin to apply the central concepts, methods of inquiry, and structure of the discipline as they contribute to the development of meaningful learning experiences.
   a. Students will become familiar with the school's curriculum and the particular subject matter most likely to be taught in the student teaching semester.
   b. In consultation with the cooperating teacher, students will develop and present at least two lessons in their discipline.

2. Continue to demonstrate their understanding of the diversity of learning styles and needs as they relate to teacher planning and instruction.
   a. Students will identify and observe learning and teaching methodologies in their major field.
   b. Students will observe how lessons are adapted to meet the needs of all students.
   c. Students will observe and develop ways to motivate students to learn.
   d. Students will observe and reflect upon the effectiveness of uses of technology in their major discipline.

3. Identify and apply a variety of strategies for establishing a positive learning environment in the classroom.
   a. Students will acquaint themselves with the department’s/school’s general policies and the rules of procedure concerning attendance, cheating, classroom disruptions, etc..
   b. Students will observe and develop strategies for establishing a positive and productive learning environment. This includes understanding, implementing and maintaining safety in the classroom and laboratory.
   c. Students will observe and develop classroom management strategies.

4. Continue to maintain Professional Standards.
   a. Students will communicate professionally with the students and parents, faculty, and staff.
   b. Students will perform duties promptly and professionally.
   c. Students will dress professionally.
   d. Students will establish a professional working relationship with colleagues.

5. Continue to grow in the role of reflective practitioner.
   a. Students will complete assignments and written reflections on planning and instruction, assessment, academic language and classroom management.

If you need an accommodation for this class, please contact the Disability Resource Center as soon as possible. The DRC coordinates accommodations for students with disabilities. It is located on the 4th floor of the Health Services Building, and can be reached at 815-753-1303 (V) or drc@niu.edu.

Also, please contact me privately as soon as possible so we can discuss your accommodations. The sooner you let me know your needs, the sooner I can assist you in achieving your learning goals in this course.
Requirements:

1. You must observe a class or combination of classes for a minimum of 40 clock hours during the Fall Semester, 2018. I strongly suggest observing more. Just because you reached the 40 clock hour requirement, does not mean you can’t do more observations. Try to be of service to the cooperating teacher as much as possible. While you are required to observe classes you should also participate in other school activities (sports and music events, clubs, etc.) whenever possible and familiarize yourself with the school, library/media center, and the guidance office. Also, spend time discussing school policies with teachers and administrative personnel, and any other activity which school officials believe would prepare you for student teaching. For each visit, an appropriate time record and activity description must be maintained and submitted. These observation hours must be complete no later than Monday, December 3, 2018. All final 401 time log sheets are due on or before December 10, 2018 as well.

2. During the course of the semester, you will complete a “Practice” edTPA. There are three Tasks. Each task has a unique set of undertakings connected to teaching a learning segment. Instructions and due dates will be presented as part of the class meeting sessions.

3. You are required to teach two full lessons in a science class (minimum) for the “Practice” edTPA. Both of these lessons must be video recorded using a digital video camera. This requires a great deal of advance planning on your part and scheduling of your time. Select dates and topics as soon as possible. Both edTPA lessons must be taught and recorded no later than Friday, November 2, 2018, and be submitted no later than Friday, November 5, 2018. Please record on a digital camera and upload it to a flash drive or CD and submit them to me. In addition, view your lesson video recordings and score your lessons using the edTPA Rubrics 6 through 10.

I am available to help you in any way that I can with this course, any component of your licensure program and your pre-student teaching preparation.

Class Schedule
Focus and Assignments: The eight seminar meetings will focus on the following topics:

8/27 Session 1:
- 401 Expectations
- Professional Knowledge and Skills Assignment
- Practice edTPA Overview
- TASK 1: Part A - Context for Learning template (Due on 9/10/2018).
- Additional work on Task 1 components: lesson planning for the learning segment, instructional materials, assessments and the planning commentary template will be due on 9/24/2018.
- Guidelines for Confidentiality
- Video permissions (Hard Copy due 9/24/2018)
- Journal Entry 1: Reflect on the classroom discipline, rules, and management of your cooperating teacher and how you would establish similar or different methods. Also reflect on teacher administrative duties (grade book, attendance, etc.). What are they, how are they done, and what are the complications inherent in them? (due 9/14/2018).
9/10 Session 2:
- Short Review of Academic Language.
- Look Ahead Document
- Planning for Scientific Understandings/Engaging students in learning.
- Supporting Student Learning in Science
- Planning Assessments to monitor and support student learning
- Start thinking about what lesson you would like to teach for the mini edTPA
- **Journal Entry 2:** Explain what academic language is. When you observed a lesson taught by your cooperating teacher, did the cooperating teacher address the academic language demands of the lesson? What would you keep? What would you do differently? Were the needs of all students addressed? If not, how would you do this in the future? (due 9/28/2018)

9/24 Session 3:
- Overview of Task 2 template (due 10/22/2018)
- Planning issues
- Video recording issues
- Video permission forms due today
- **Journal Entry 3:** Discuss the difficulties that you encountered in planning the lessons. What might you do differently in your future lesson planning? (due 10/26/2018)

10/8 Session 4:
- Learning Environment
- Engaging Students in Learning
- Deepening Student Learning during Instruction
- Analyzing Teaching
- Video recording of a lesson; apply rubrics 6 through 10 score and discuss.
- **Journal Entry 4:** Discuss the problems encountered during video recording and how those might be addressed in the future. (due 11/05/2018)

10/22 Session 5:
- Analyzing Student work
- Aligning Assessments with Objectives
- Using feedback to Guide Further Learning
- Using Assessment to Inform Instruction
- **Journal entry 5:** Describe effective types of assessment you have observed in the 401 clinical. How were those assessments used to guide further learning? How were they used to inform instruction? (due 11/19/2018)

11/5 Session 6: TBD

11/19 Session 7:
- Leadership
- Student teaching
- Student Teacher Orientation
- Wrap up: Reflections

12/3 Session 8: TBD

12/10 – Finals Week
