From colonial America to colonial India, the Berlin Wall to Tahrir Square, nonviolent resistance movements have proven capable of toppling regimes and recasting the geopolitical landscape. This course will examine several questions: What exactly constitutes nonviolent resistance? Why do some groups employ it while others turn to arms? Why and when is it effective? What, if anything, can the international community do to help nonviolent movements succeed? Finally, what are its consequences for human, national, and international security?

Global environmental problems -- climate change, biodiversity loss, depletion of freshwater resources, the hole in the ozone layer, the international transport of hazardous waste, etc. -- are some of the most pressing political concerns in the international arena. This course introduces students to the study and practice of transnational environmental issues through an exploration of the prominent actors, theoretical approaches, and institutions, both in and outside of government, relevant to the study of global environmental politics. The course will conclude with a focus on how best to respond to global environmental challenges and a simulation of global climate change negotiations.

Crime & Mental Illness: This course focuses on the study of crime, violence, and mental illness. We will first discuss different types of mental illness. We will then examine research on public perceptions of violence and stigma associated with mental illness, and mental illness in mass media. Next, we will examine research on how mental illness is related to crime and violence, including the role of deinstitutionalization, the prevalence of mental illness in
jails and prisons, and how violence occurs in neighborhoods and families. Finally, we will discuss legal and treatment issues, including the role of police, courts, and community programs.

Leonardo da Vinci, Michelangelo, Raphael, and Titian, looked back to antiquity and forward (unknowingly) to the twenty-first century. Their architecture, sculpture, and painting became the dominant artistic influence in the West from 1500-1900, and continue as a strong influence in the arts today. We will examine how this art grew out of philosophical and scientific traditions, as well as out of the political, religious, and social concerns of that time.

Any artist works within an historically distinct and limited field of possibilities defined by the artworld - defined, that is, in the discourses of other artists, critics, theorists, historians, curators, dealers and collectors. Thus, study of the history of art is really a study of ideas about art. The era of contemporary art begins in the mid-1950s, when artists adopt Duchamp's insight that art is conceptual, not visual. This means that an
artwork is not primarily a visually stimulating object; instead, it is a vehicle for investigation and communication. Rather than focus on individual artists or movements, this course covers significant discourses about the nature and goals of advanced art-practice in an era of increased institutionalization and commodification of art.

This course satisfies PLUS (Creativity and Critical Analysis) requirements, is included in the Creativity, Innovation and Change Pathway, and has been certified as Writing Infused. ARTH 550C by permit only.

In this seminar we will address medieval Rome’s complex relationship with its classical past as evidenced through such activities as the use of spolia (re-used architectural fragments), the repurposing of ancient buildings, and the collection of ancient sculpture displayed at the Lateran. Interdisciplinary in approach, the course will also involve the analysis of a number of medieval texts (in English translation), including pilgrims’ guides and Master Gregorius’s Marvels of Rome, a 13th-century English “tourist” account of the city and its sights.

ARTH 494 is required for Art History majors and open to advanced students in other programs. ARTH 486 is a pre-requisite for this course. Permit required.

In this topics class, students explore a range of techniques for making two-and three-dimensional woven work. Technical information includes pattern and pictorial weaving, textile dyeing/printing/painting, and 3D woven construction processes. After initial experimentation with techniques, students are encouraged to push the boundaries of the media, using both traditional and experimental materials. Students are challenged to explore the sculptural potential of weaving, the metaphors inherent in textiles, and the narrative capacity of cloth.
