

- Date, time, place: Monday, October 9, 2023, 9:20 – 10:59 AM,
- Do bring:
 - Pencils and erasers
 - One standard 8.5×11 -inch sheet of paper with anything you want **in your own original handwriting**. You may use both sides of the sheet, or one side of two sheets, if you prefer (and I recommend). Write as small as you want, but if you write much smaller than you normally would you are probably overdoing it.
 - **Blank paper of your choice for your answers.** (You may pre-initialize each page. I will be scanning these to email back to you.)
- No need to bring (and not to be used):
 - Books, calculators, electronic devices of any kind, notes other than described above
- What to study:
 - Topics, concepts, and techniques covered in class and the homework. Understand the postulates of quantum mechanics and how to use them. **Studying homework problems, and the concepts that they involve, is your best use of time.**
- Homework 5 must be turned in no later than 11:00AM on Friday, October 6. Solutions will be emailed to you at that time.
