College of Education

The departments of the College of Education offer baccalaureate programs leading to the degrees Bachelor of Science (B.S.) and Bachelor of Science in Education (B.S.Ed.). The College of Education offers a contract major leading to the B.S. degree and the Bachelor of General Studies (B.G.S.) degree.

Contract Major

The College of Education offers students opportunities for constructing two types of individualized programs of study which differ from the university’s regular major and minor programs. These individualized programs, termed the B.S. contract major and the Bachelor of General Studies (B.G.S.) degree, utilize existing university courses. The requirement of the contract major replaces the requirement of a regular departmental major. (See the section “University Graduation Requirements.”)

Each of the two programs offered by the College of Education addresses a different set of educational objectives. The B.S. contract major allows a student with unusual and well defined academic interests to design a major with the advice of a faculty sponsor. The B.G.S. degree, by contrast, requires no formal major; it is a minimally structured program built around a general curriculum of courses offered primarily in the College of Education. The B.G.S. degree is expected to appeal primarily to mature students with broad academic interests whose educational objectives may not include preparation for a specific professional career.

The student learning outcomes for the contract majors of this degree are located at
Admission
Students seeking approval for a contract major in the College of Education must have at least sophomore standing and must file an application with the College of Education. Information and forms can be obtained from the College of Education student services office.

Requirements for the B.S. Contract Major
A student may formulate a proposal for a major program of study appropriate to the College of Education which differs substantially from existing major programs but utilizes existing courses. The student must select a faculty sponsor from the college’s faculty and major department in the College of Education in which the majority of the course work is being taken. The student formulates the proposal in consultation with the faculty sponsor. The program must be logically structured around a meaningful and interesting theme or topic, for example, adult services for persons with disabilities. Students desiring to build programs of this kind using a core of courses offered by other colleges should consult with those colleges. An example of such a program would be a contract major in early childhood facilities management, which might couple work in early childhood education and business. Students desiring programs involving a substantial amount of course work in colleges other than the College of Education will be required to secure a cosponsor from the discipline housing such course work.

The student who wishes to propose a B.S. contract major must have a cumulative GPA of at least 2.50.↓

must include a capstone experience; and

must complete 45 semester hours after the semester in which the program is approved.

A student’s program of study must be approved by the student’s faculty sponsor, the curriculum committee of the department in which the majority of course work is being taken, the associate dean of the college, and the College of Education Curriculum Committee, and the College of Education Associate Dean for Academic Affairs.

A student who completes an approved contract major and all other graduation requirements will receive the degree Bachelor of Science with a contract major in ______ (the theme specified in the contract).

The college reserves the right to deny contract majors that overextend the resources of a department.

Requirements for the B.G.S. Degree
The College of Education offers students the opportunity of constructing individualized programs of study which are different from the university’s regular major and minor programs....

\*

NOTE: The degree Bachelor of General Studies is not as well understood outside the university as traditional baccalaureate degrees. Students earning this degree may be required to convince prospective employers or graduate schools that the degree will enable them to succeed in a particular job or a future

School of Interdisciplinary Health Professions (AHRS, HSCI)

The School of Interdisciplinary Health Professions offers majors in Health Sciences (B.S.) with a degree completion emphasis, Rehabilitation and Disability Services (B.S.), and a minor in deafness. Degree paths in these majors prepare students for entering the workforce, professional degree programs, or advancement in health careers. Opportunities for skill development, academic success, and career exploration in health and rehabilitation-related fields are fostered through collaborative learning, cocurricular activities, and faculty mentoring. Academic offerings in the Health Sciences programs include prerequisite classes for medical laboratory sciences, nursing, and physical therapy programs with efficient course sequencing toward degree completion. Academic offerings in Rehabilitation programs prepare students for entry level employment and preparatory course work for graduate studies in occupational therapy and rehabilitation counseling.

Majors in the School of Interdisciplinary Health Professions who are preparing for professional practice may be dismissed from a program on the basis of either academic deficiencies or nonprofessional performance. Specific criteria relating to these areas are made known to each student at the time the professional phase of a program is initiated.

[Note: The major in health sciences is not new. It will be moved to the School of Interdisciplinary Health Professions from the School of Allied Health and Communicative Disorders.]

Major in Health Sciences (B.S.)

The Bachelor of Science in Health Sciences program is designed to prepare the student to enter allied health and other health related fields. The health sciences program focuses on providing the student with a strong foundation through general education and health science-based curriculum with a focus on health care leadership skills, financial principles, management strategies, and standards to improve patient care. This major is intended for students interested in the fields of medical laboratory sciences, nursing, physical therapy, and other health professions.
The student learning outcomes for this degree are located at [www.niu.edu/assessment/clearinghouse/outcomes/index.shtml](http://www.niu.edu/assessment/clearinghouse/outcomes/index.shtml).

**Requirements in School (21)**
*AHRS 200 - Disability in Society (3)*

Total Hours for Emphasis 2. General: (71-84)

Emphasis 3: Degree Completion
This off-campus/online emphasis is designed uniquely for health and human sciences professionals. Applicants must be practicing health or human sciences professionals who hold a current professional credential, certificate, or license in a health or human sciences field and have completed an applied associates degree program or equivalent number of credits. The professional credential, certificate, or license must be in the field in which the applied associates degree or course work was earned.

The student who wishes to apply for this emphasis must

be admitted to NIU
have a cumulative GPA of at least 2.00
submit a Health Sciences Degree completion application including a written professional goals statement and copy of the professional credential. The application is available via: http://niu.edu/ora/ or the College of Health and Human Sciences advising office.

Students may be awarded up to 30 semester hours of proficiency credit for the learning experiences and education in the discipline in which they hold certification and/or licensure. Proficiency credit will be awarded during the last semester prior to degree completion. Students in this emphasis are exempt from the 30 semester hour university residence requirement.

Requirements in School (7)

Elective (3)
*PHHE 295 - Introduction to Public Health (3)
OR selected with consent of adviser

Total Hour for Emphasis 3. Degree Completion: (46-47)

Footnotes:
1 Allow substitution with any three credit hour Abnormal Psychology course
Major in Rehabilitation and Disability Services (B.S.)
Students in this degree are preparing as entry-level professionals in the area of human/social services to persons with disabilities. The required courses provide a basic background in disability and rehabilitation concepts. Entry-level positions (e.g., job coach, job placement specialist, case manager) can be obtained by students with the baccalaureate degree. Students desiring clinical positions (e.g., rehabilitation counselor) must obtain a master’s degree in Rehabilitation Counseling.

The student learning outcomes for this degree are located at www.niu.edu/assessment/clearinghouse/outcomes/index.shtml.

Requirements for a B.A. Contract Major

The College of Visual and Performing Arts also offers students the opportunity to construct individualized programs of study culminating in the degree Bachelor of Arts. The policies and procedures governing this program are identical to those outlined below for the degree Bachelor of General Studies, contract Major. The essential differences between the two opportunities for contract major are that the more traditional B.A. degree is better understood outside of the university by prospective employers and by graduate schools, and that The B.A. degree requires demonstrated competence in a foreign language. Students whose academic interests include foreign languages or whose programmatic goals would be enhanced by such study are encouraged to pursue their contract majors under the B.A. degree. (Attention is directed to the section of the catalog entitled “Other Graduation Requirements” and the heading “Foreign Language Requirement for the B.A. degree.”)

Requirements for B.G.S. contract Major

The student learning outcomes for this degree are located at www.niu.edu/assessment/clearinghouse/outcomes/provost/general-studies-bgs.pdf

The College of Visual and Performing Arts offers inclusion in the program.

The contract major program allows a must be approved by the College Contract Major Committee.

The student who wishes to propose a contract major must

have a cumulative GPA of at least 2.50
SECTION C – Items previously in Section B, now reported for inclusion in the 2018-19 Undergraduate Catalog

Earn at least 30 semester hours of the contract major program in upper division courses.

A student who completes an approved contract major and all other graduation requirements will receive the degree Bachelor of General Studies Bachelor of Arts with a contract major in_________(the theme specified in the contract).

Examples of contract themes that have been proposed include musical theatre, audio engineering technology, photography, scientific illustration, and arts management, and art therapy.

NOTE: Because it is an innovative program, the degree Bachelor of General Studies … … future educational endeavor.
